

A Structural Position in a Planetary Compute Fabric

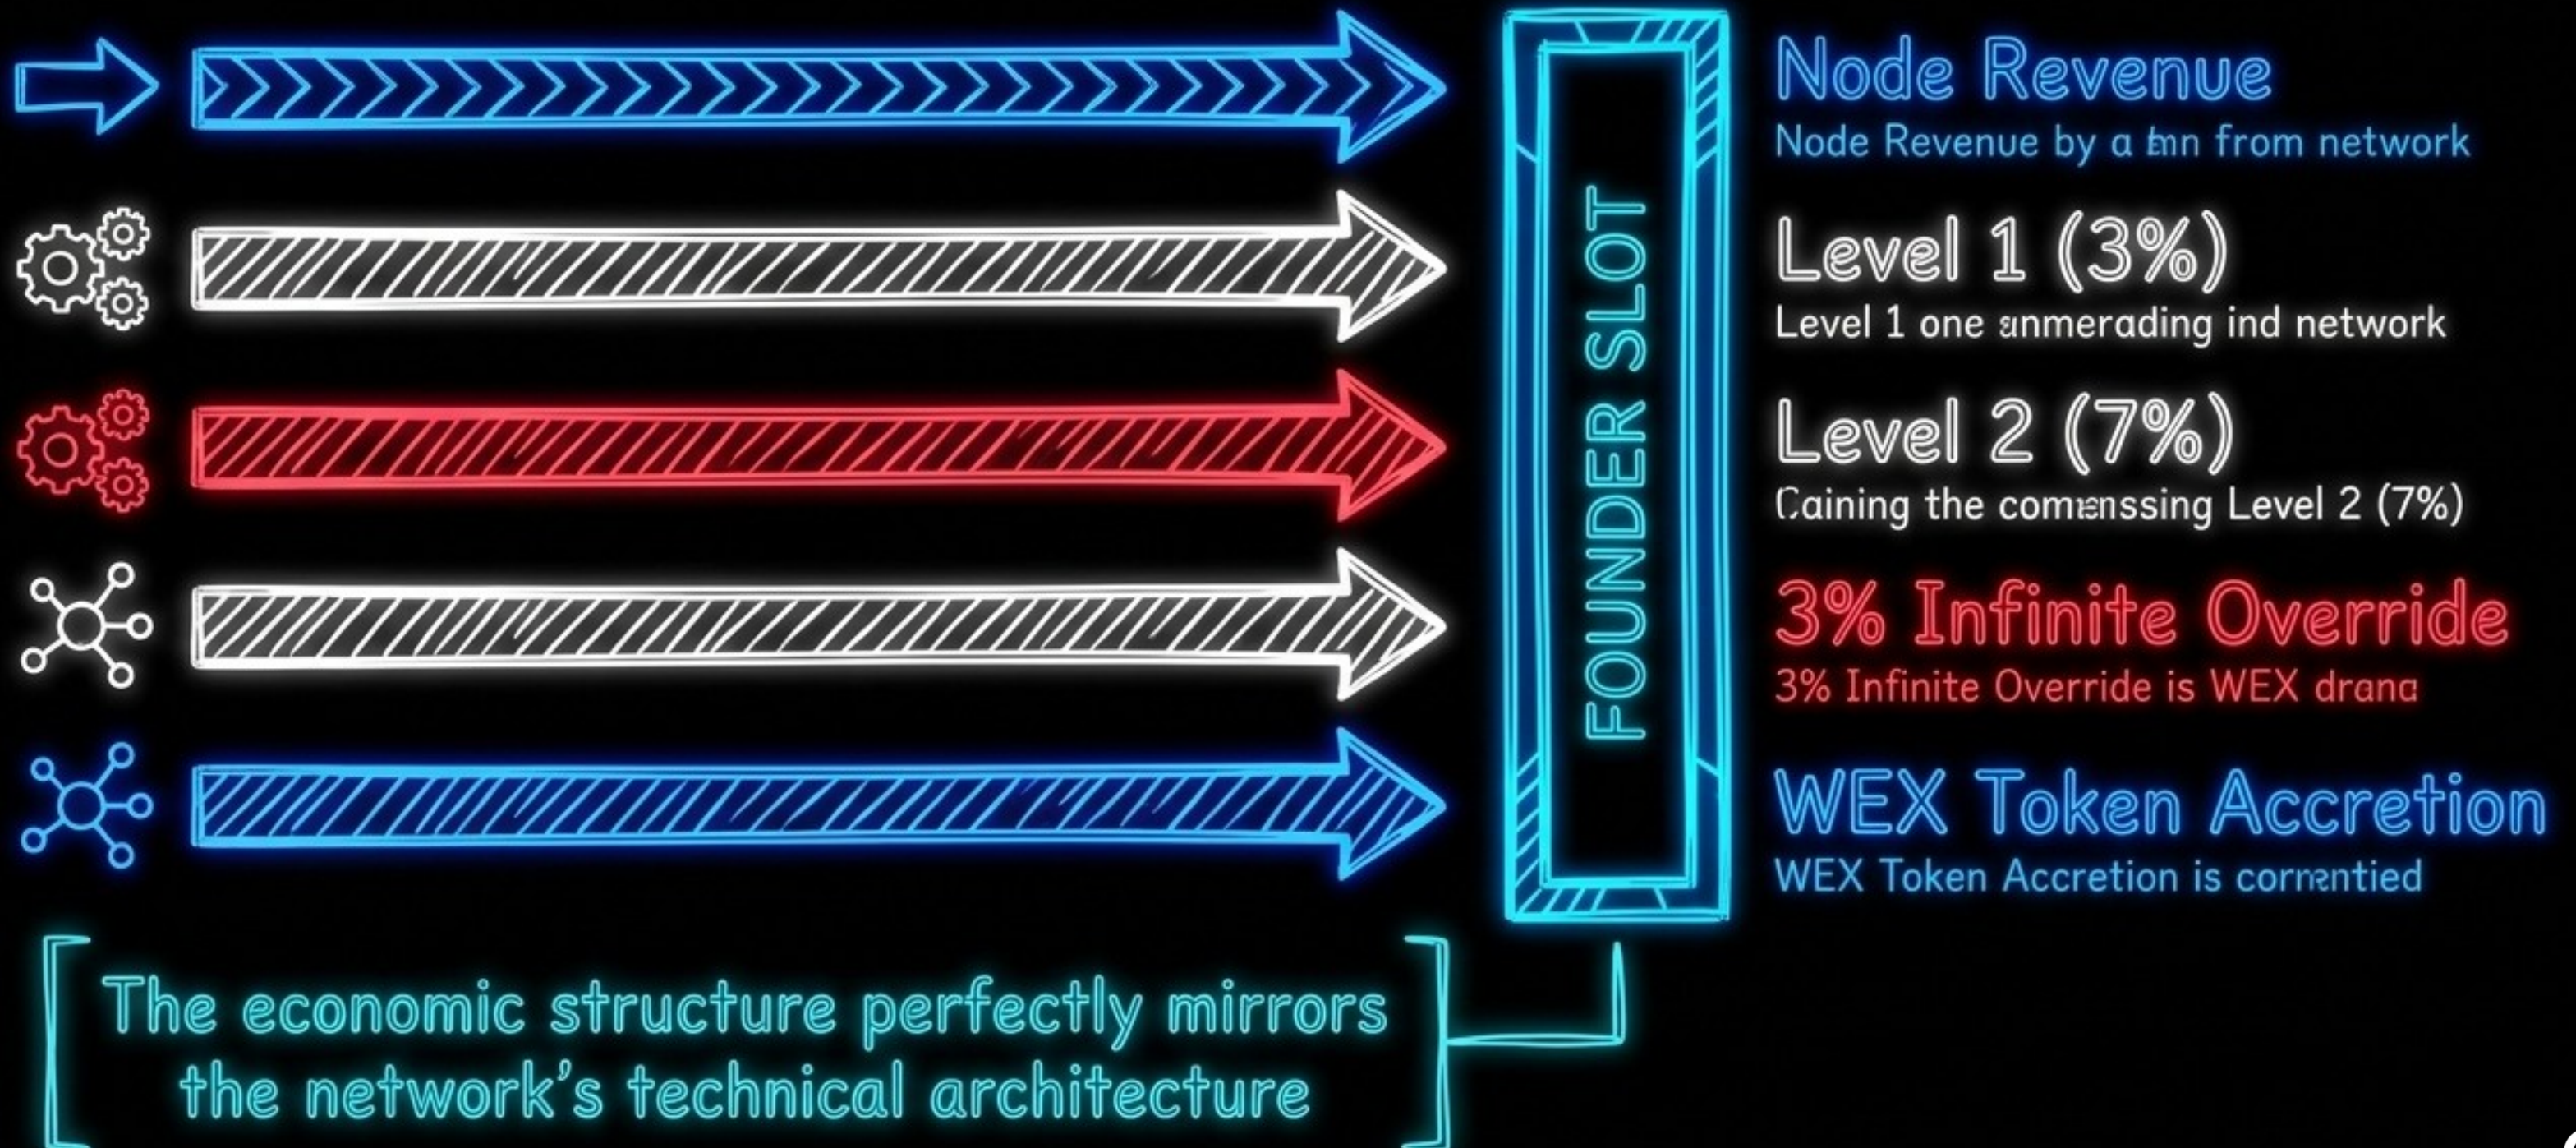

A Living, Expanding Economic Structure

THE CRYPTOGRAPHIC ROOT

The Founder sits at the absolute top of a dedicated identity topology.

Layered, Compounding, Self-Expanding

Structural Leverage at Global Scale

The Infinite Funnel

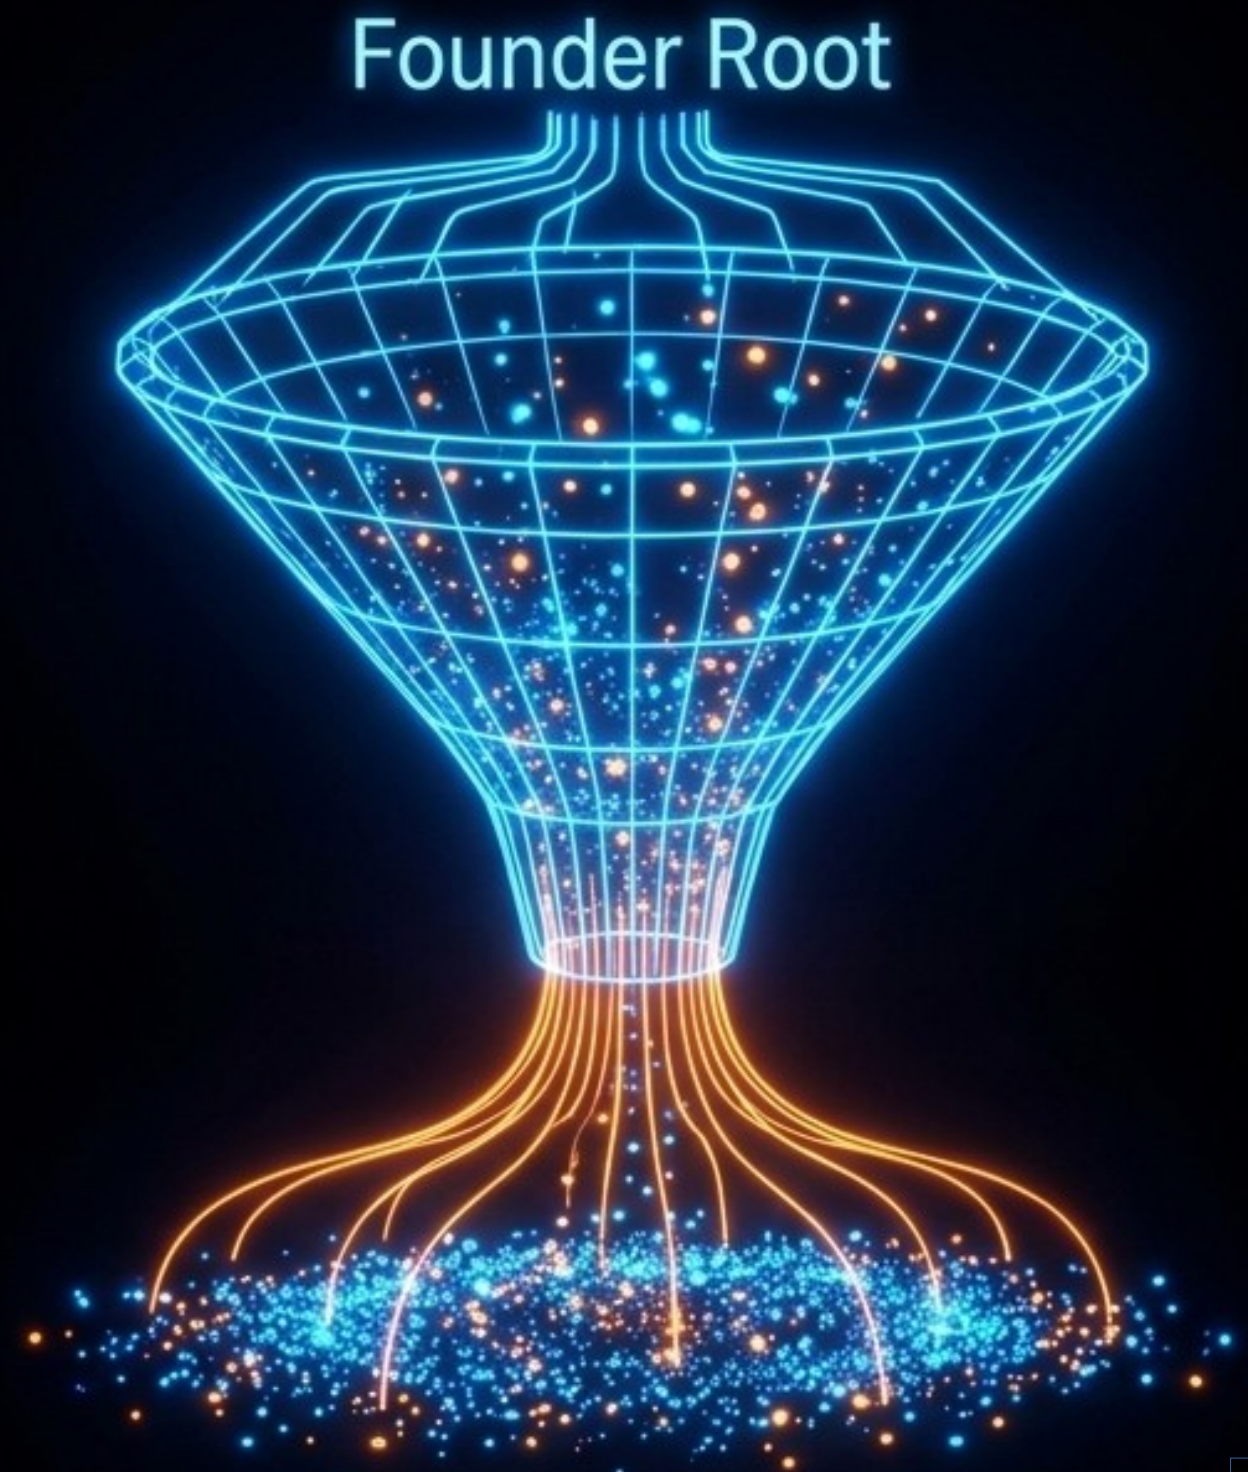

Every participant, device, and compute execution within the Founder's lineage contributes 3% of its FIAT revenue upward.

Cryptographic Immutability

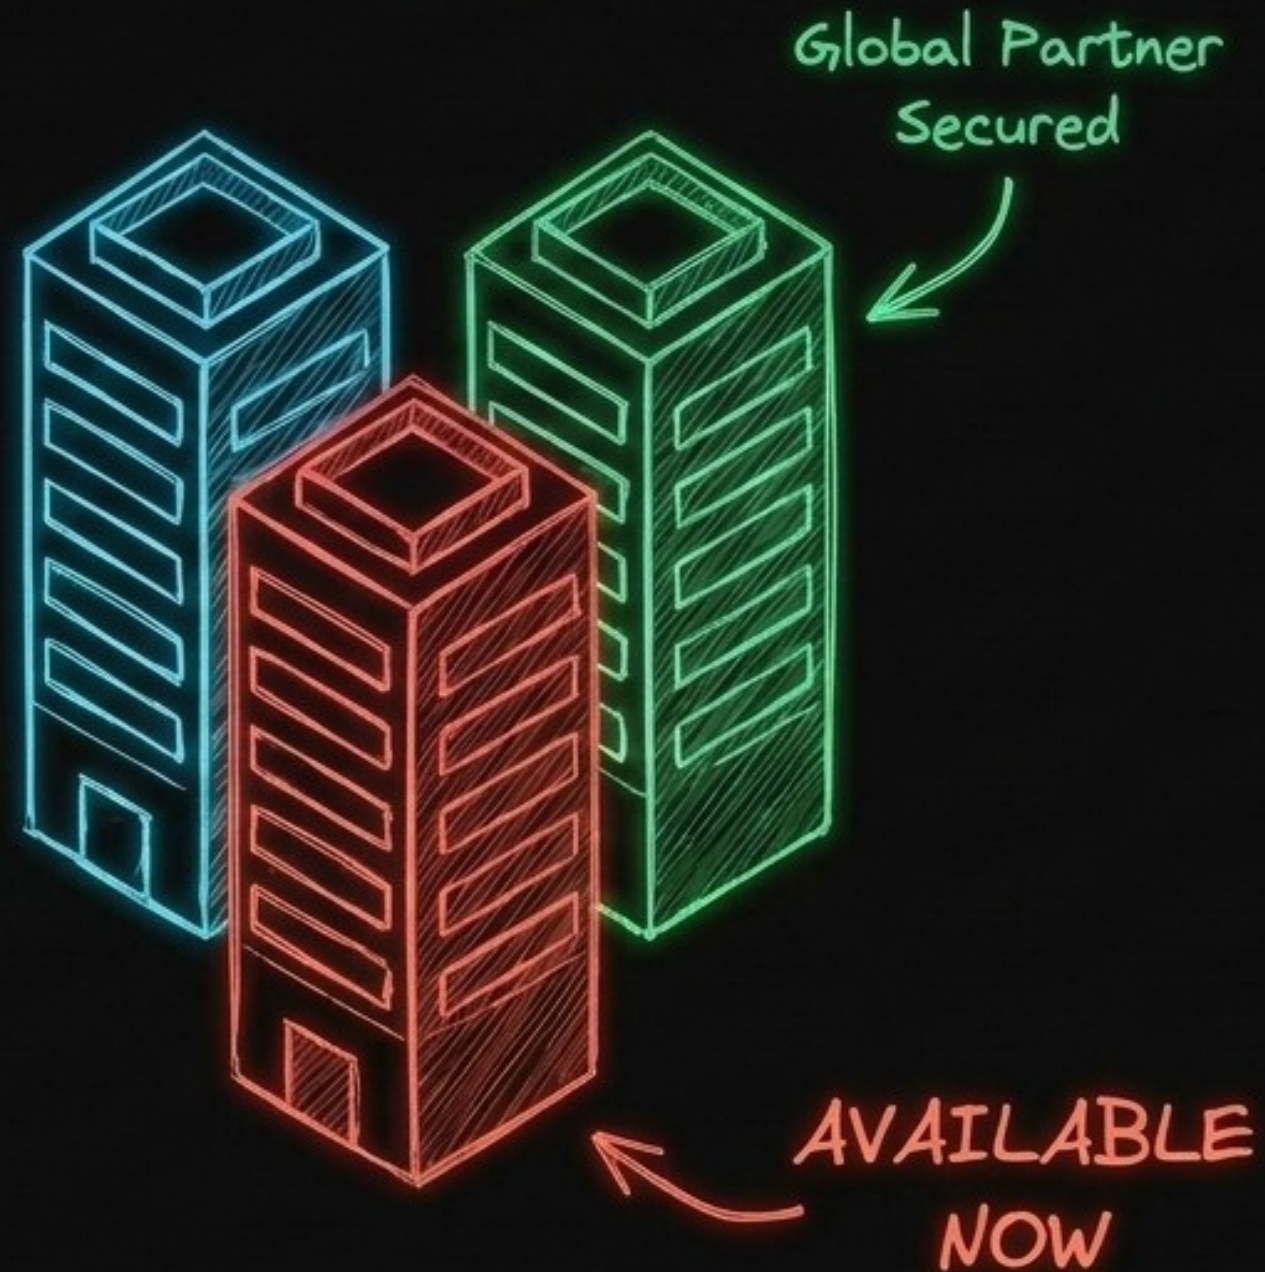

The identity graph is hardcoded. Lineage cannot be diluted, bypassed, or reassigned.

The Ultimate Asymmetry

As Wnode absorbs the \$1T AI compute market, this override captures a compounding slice of global execution throughput.

Scarcity, Permanence, and the Only Moment to Enter

 The Physical Limit	Only three public Founder Slots engineered into the root architecture.
 The Acquisition	\$100,000 for all 3 slots.
 The Rule of Permanence	A one-off opportunity. Once a slot is taken, the position is sealed into the cryptographic layer forever.
 Target Allocation	Engineered specifically for family offices, HNW individuals, and strategic private networks seeking structural leverage in the AI era.
