

1. **Wenode** Affiliate Viral Growth Engine – Founder Slots

The **Wenode** affiliate tree is a structured, performance-based growth engine designed to reward participants for expanding the network through direct referrals and downstream activity. It exists to create a self-propelling acquisition loop, similar to the early referral systems used by companies like Dropbox, Uber, and Revolut, where aligned incentives produced exponential user growth. Each participant benefits from the activity of their network, which encourages consistent outreach, onboarding, and education. This model is particularly effective for **Wenode** because every new node operator increases the network's capacity and value, making the affiliate tree a natural fit for viral expansion. By aligning economic incentives with ecosystem growth, the affiliate structure turns early supporters into active distribution partners, accelerating adoption without traditional marketing spend.

2. **What a Founder Slot Is**

A Founder Slot is a permanent governance position within the **Wenode** ecosystem. Each Founder slot grants its holder:

- A lifetime seat on the Governance Board
- Direct participation in protocol-level decisions
- A non-transferable Founder Soul identity
- A perpetual 3% override on the global affiliate tree under that Founder

They are constitutional, permanent, and capped at three.

3. **Purpose of the Founder Slots**

Founder Slots exist to:

- Establish a stable, long-term governance structure
- Ensure external oversight and guidance from experienced operators and investors
- Anchor the early ecosystem with independent advisors
- Align long-term incentives through a perpetual economic position

They are designed for individuals who want a formal, ongoing role in shaping the direction of the orchestration layer.

4. **Perpetual 3% Override — Economic Structure**

Each Founder Slot includes a 3% override on their own entire affiliate tree, not just 2 levels, paid indefinitely.

This override:

- Applies across all generations
- Scales automatically as the network expands
- Requires no operational involvement
- Functions as a long-term revenue-generating instrument
- Aligns Founder incentives with ecosystem growth

As node operators join and workloads increase, the override becomes a compounding economic position tied to:

- Operator growth
- Workload volume
- Geographic expansion

For early participants, this creates a durable ROI mechanism that grows with the network.

Founder Slot Pricing

1st Founder Slot — \$25,000

- First governance seat
- Full governance rights
- Perpetual 3% override

2nd Founder Slot — \$35,000

- Second governance seat
- Full governance rights
- Perpetual 3% override

3rd Founder Slot — \$55,000 – *Not available in this funding round*

- Final governance seat
- Full governance rights
- Perpetual 3% override

These three positions complete the Founder Council.

Governance Responsibilities

Founder Slot holders participate in:

- Protocol governance advice
- Incentive and economic design advice
- Ecosystem policy and direction advise
- Over-site of the sovereign orchestration layer

This is a formal governance advisory role.

5. Exclusivity

The Founder Council is permanently capped at three external seats.

No additional Founder Slots will be created.

This ensures:

- Predictable governance
- Non-dilutable influence
- Long-term structural stability

6. Founder Exit Policy

A Founder Slot includes a **live, growing affiliate tree** that belongs to the Founder for as long as they hold the slot. If the Founder later sells the economic rights to that tree, the tree continues to grow organically from its existing structure, but it no longer receives new Level 1 affiliates because those are reserved exclusively for active Founders. In the event the original Founder leaves the advisory board, the economic rights to their existing tree remain with them or their buyer, and a **new live Founder Slot** is created for the incoming Founder, complete with a fresh tree that can accept new Level 1 affiliates. This ensures the departing Founder retains the full economic value of their original tree, while the advisory board always has an active Founder with a live, expandable position.
