

Wnode: AI-Powered Planetary Compute Mesh

Turning the world's idle hardware into sovereign, decentralised AI compute.

Unified Strategic Document • Technical Whitepaper • Constitution

COMPUTE SCARCITY

AI demand is **exploding** toward **\$1 Trillion**. Cloud monopolies artificially bottleneck supply, leading to high, unpredictable pricing and vendor lock-in.

HARDWARE ABUNDANCE

Up to 75% of global devices-laptops, desktops, servers-sit idle. This represents massive, wasted economic potential.

COMPUTE - THE NEW ECONOMY

Compute is rapidly becoming the **foundation of the new economy** - a resource created by everyday devices and unlocked by the people who own them.

The shift is underway: from centralized fiat and cloud monopolies to decentralized, community-owned compute.

Nodlrs
(Compute Providers)

Instant Fiat Revenue.

"Granny-proof" 3-click onboarding.
Zero technical expertise required. Turn
idle laptops, Mac Studios, or EV computers
into a lifetime revenue stream.

Enterprise Clients
(Compute Buyers)

70-90% Cheaper than AWS.

Pay only for what you use.
Pay only for what you use. Zero vendor lock-in.
Massive, elastic global capacity perfect for
parallel AI inference and burst workloads.

Open-Source Developers

Hackable, Zero-Trust Architecture.

Modular, extensible, and open. Build apps
and plugins directly on the WNODE protocol.

Tokenomics

Finite supply assurance.

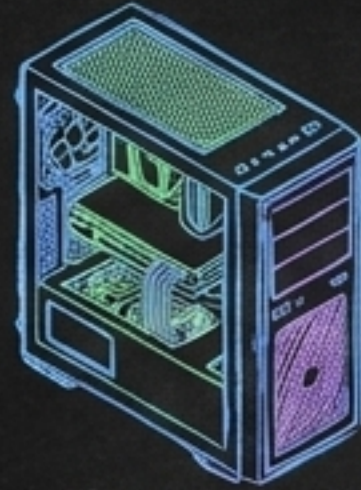

Highly scalable margin capture. Viral growth
loops built into the commercial DNA.

Layer 1: Physical Architecture & Node Diversity

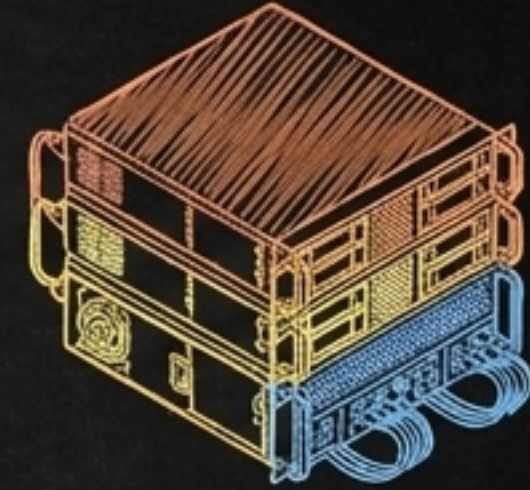

Browser WASM Nodes

Lightweight, sandboxed, zero-installation. Seamless onboarding via a simple URL click.

Desktop App Nodes

Macs, PCs, and idle gaming rigs. Full hardware reporting for long-running, high-performance jobs.

CLI/Enterprise Nodes

Headless servers, BYD fleets, and super machines.

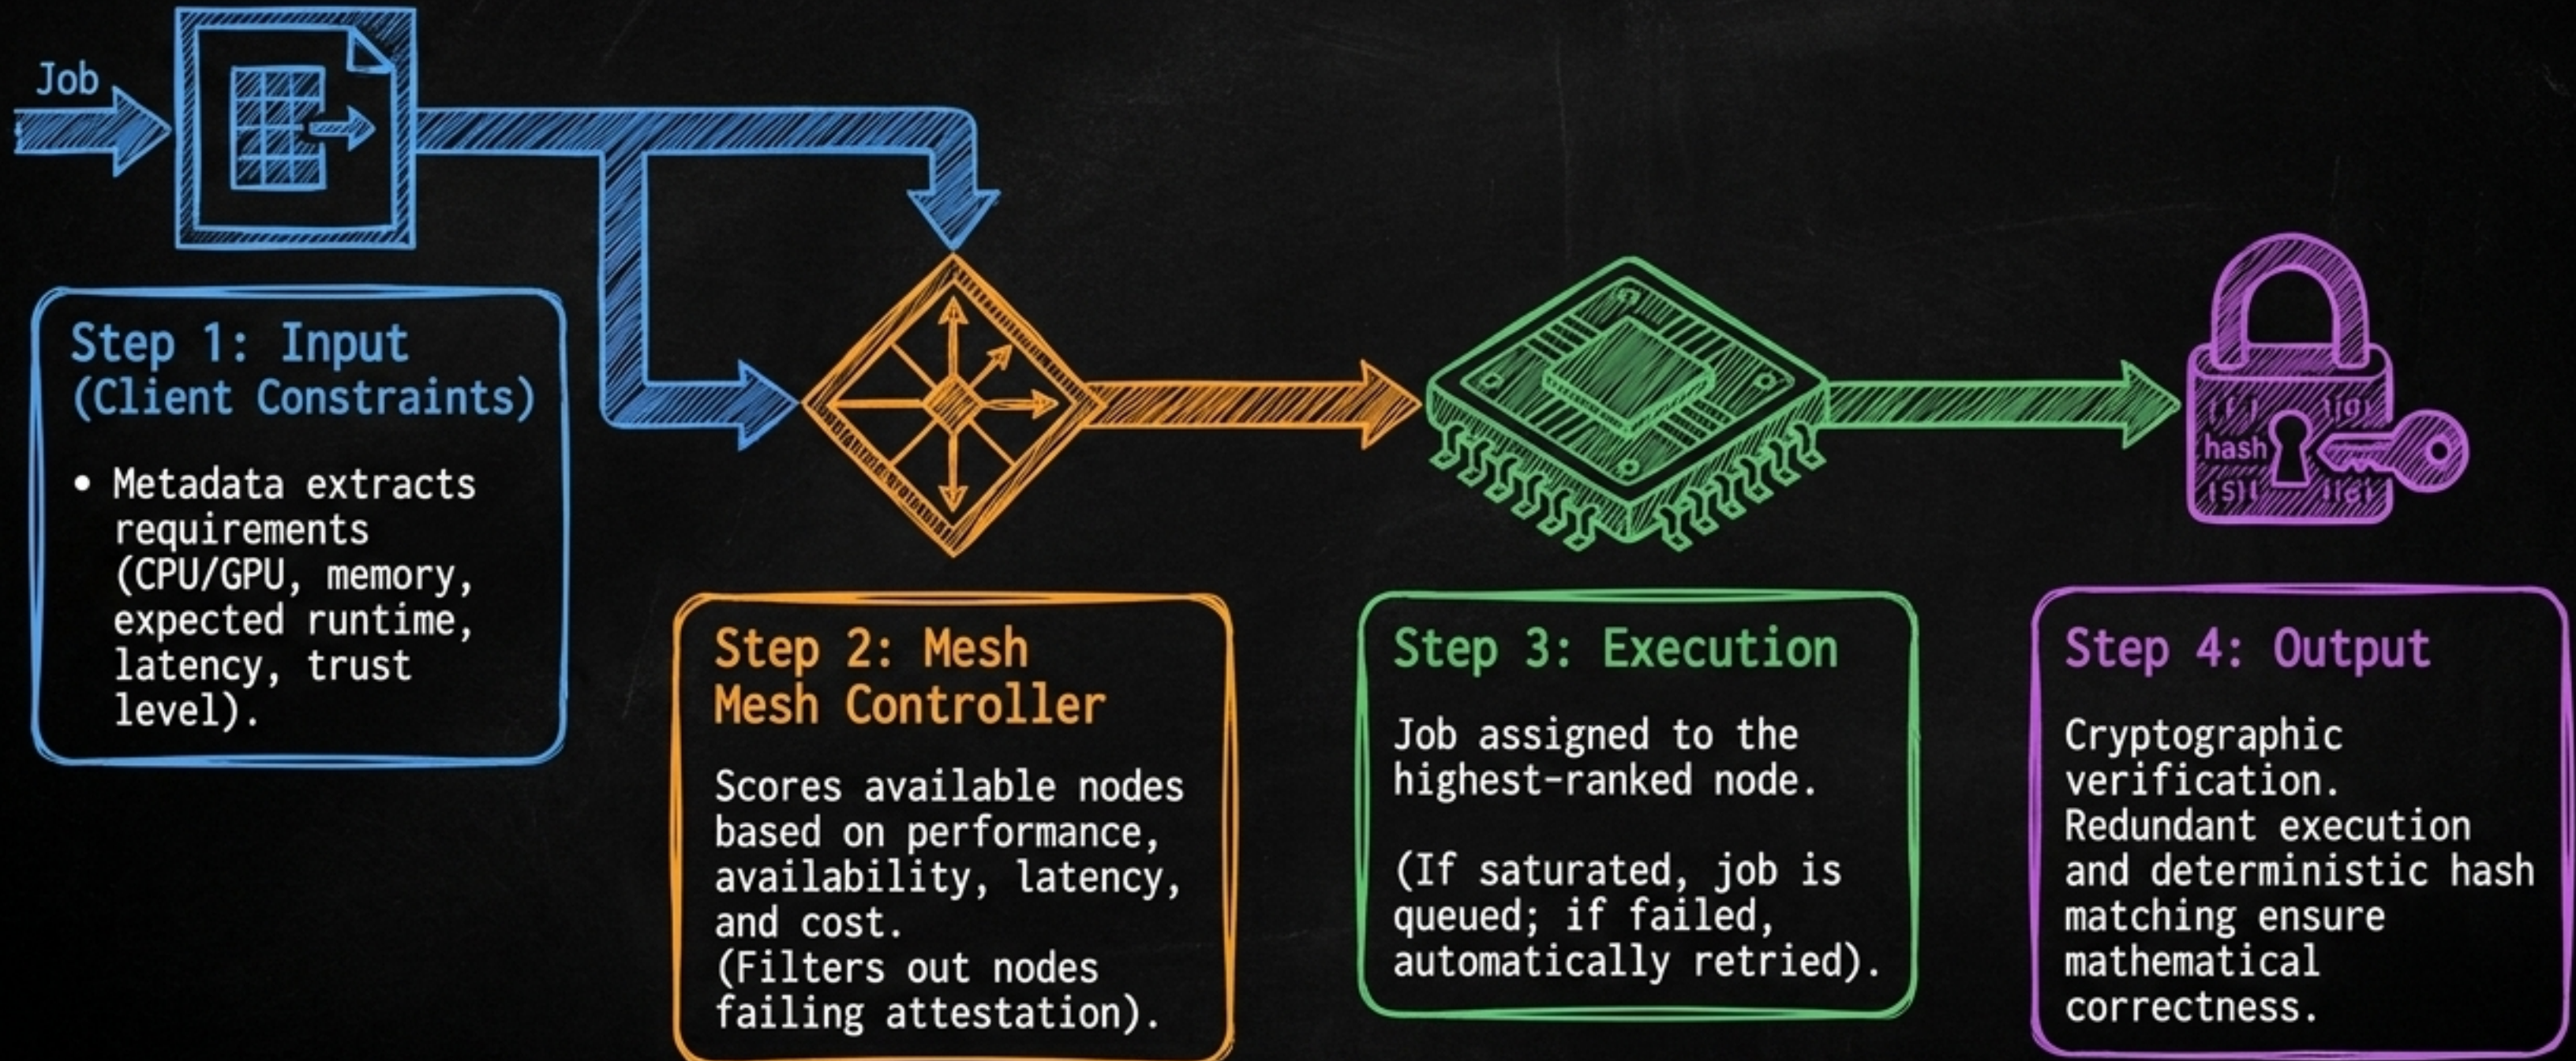

High-Leverage Partner Targets for Instant Mesh Density

Robotics: Agility Robotics (Digit) - massive idle charging cycles.

Automotive: BYD EVs - high-end Snapdragon computing on wheels.

IoT & TV: Xiaomi & Hisense - millions of connected global SoCs

Layer 2: The Autonomous Routing Engine

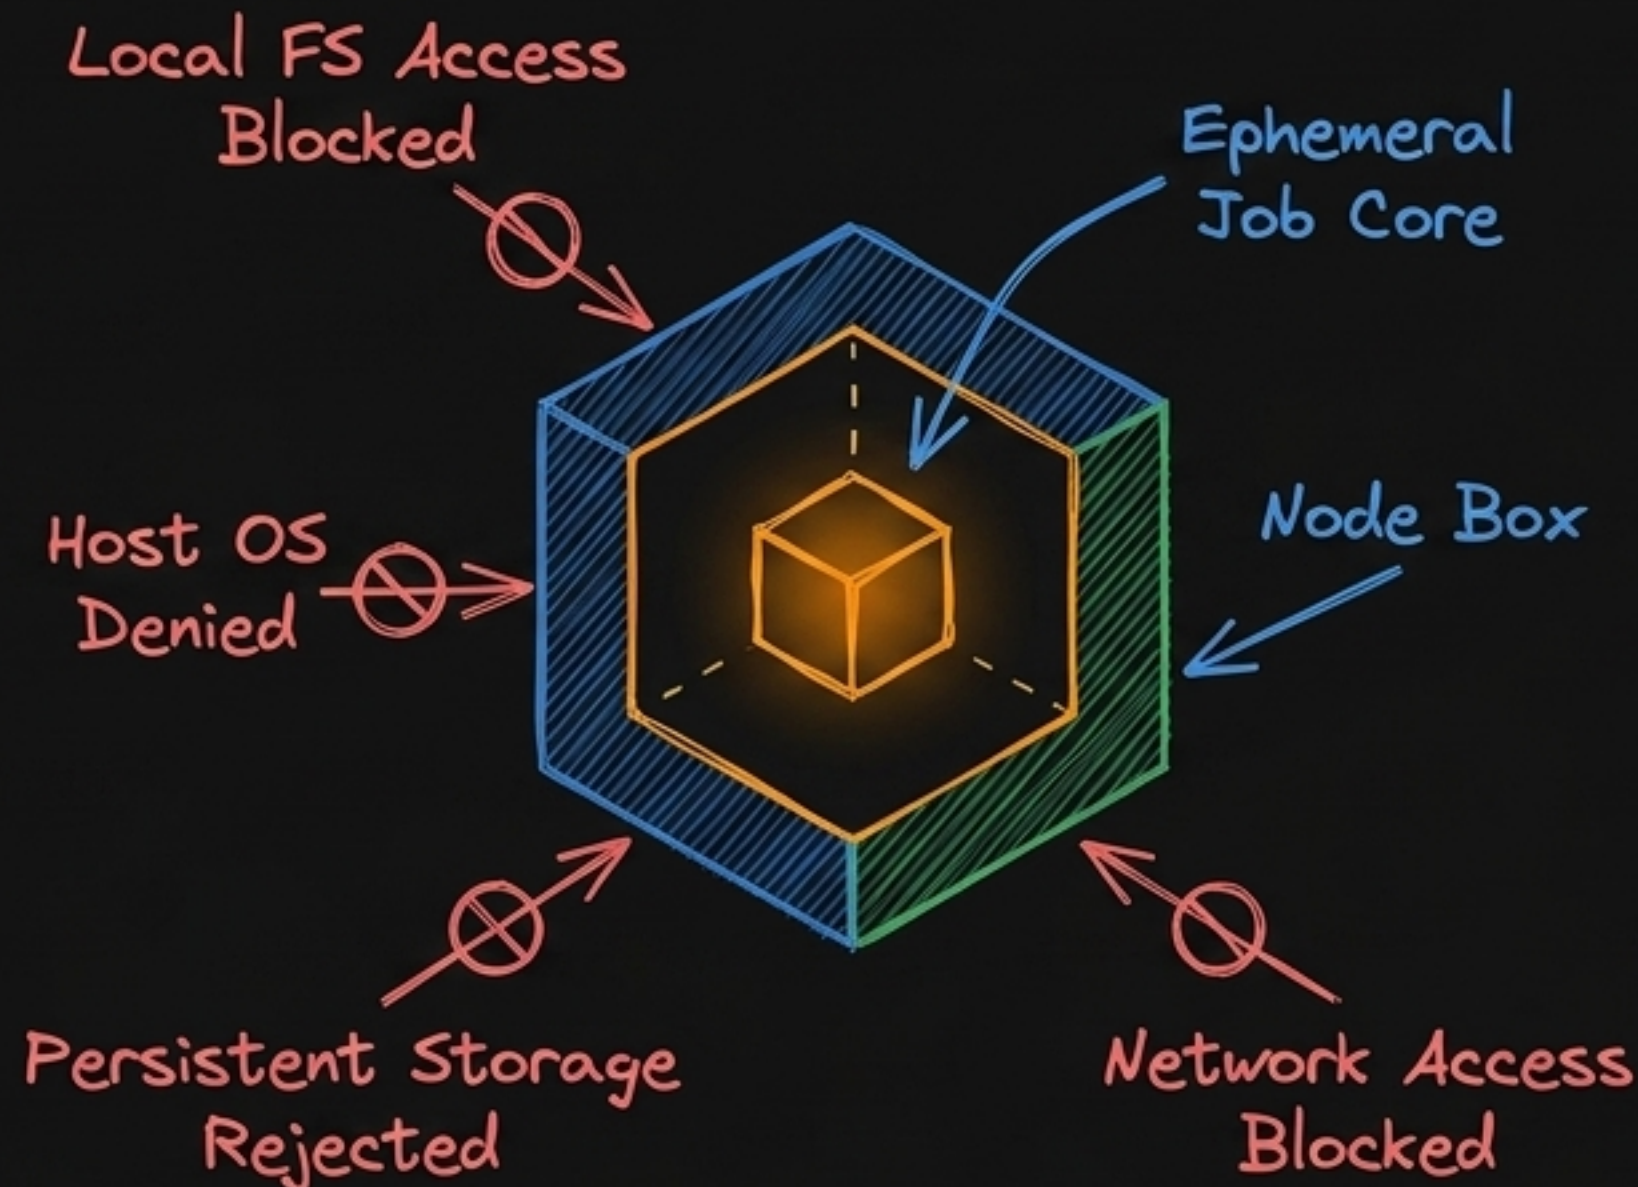

Layer 3: Zero-Trust Execution Sandbox

AWS Lambda, powered by people instead of data centers.

What Nodes CANNOT Do (Strict Isolation)

- Local FS Access
- Host OS Storage
- Host OS Location
- Persistent Storage
- Persistent requests

The Execution Core

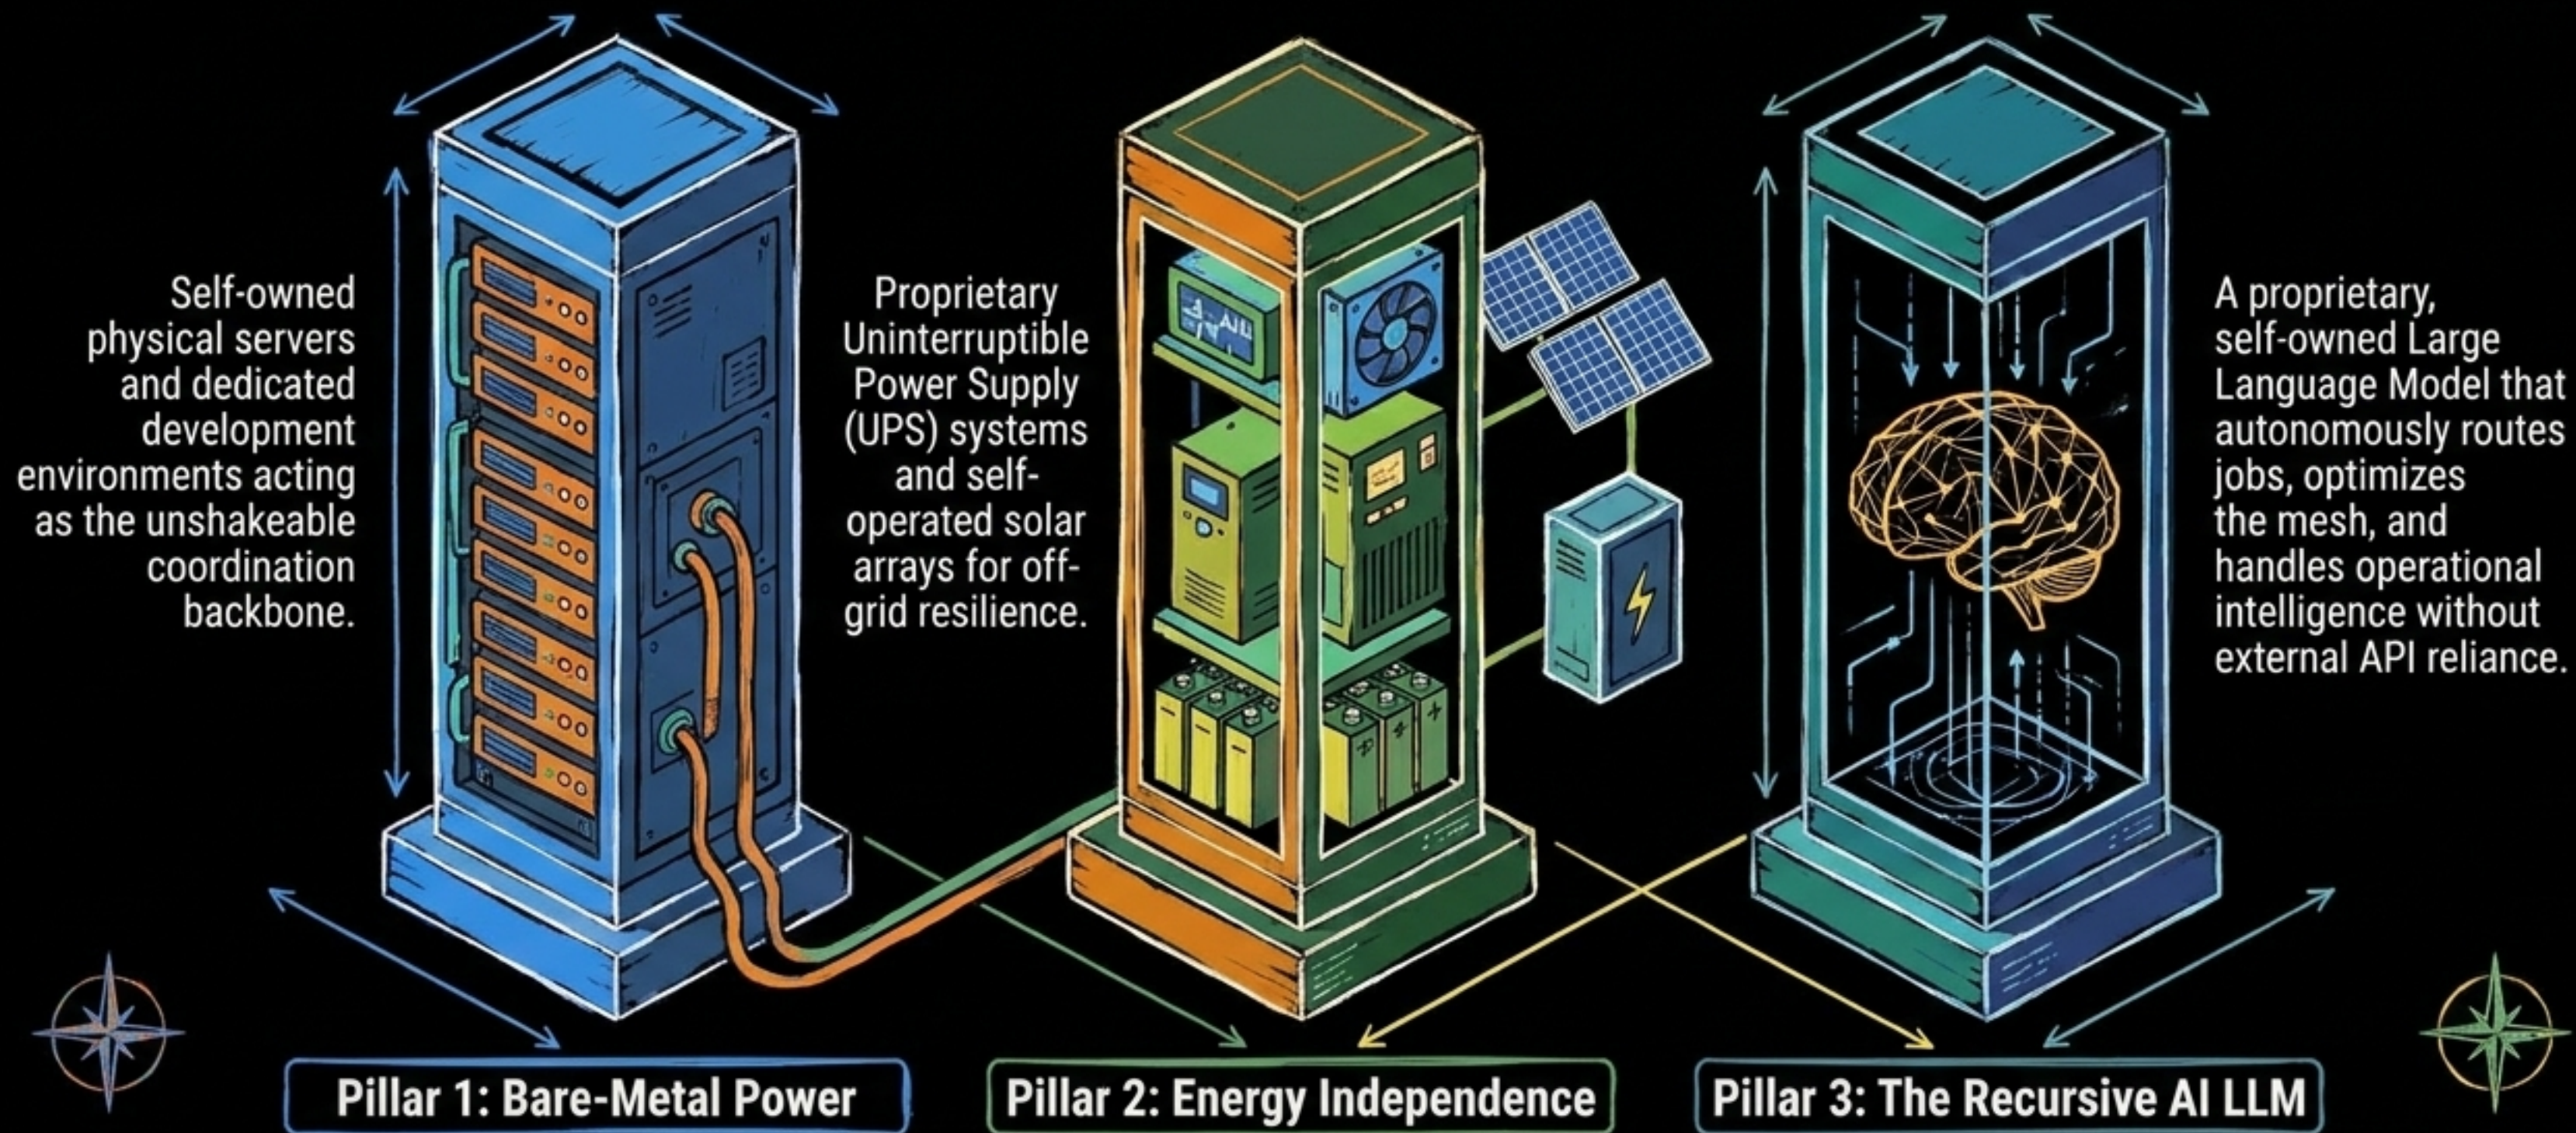

- RAM-only, stateless execution
- Sandboxes and non-sandboxes data for execution compute

Result: Cryptographically secured, completely confidential processing.
Enterprise data is instantly destroyed post-compute.

Layer 4: Infrastructure Sovereignty

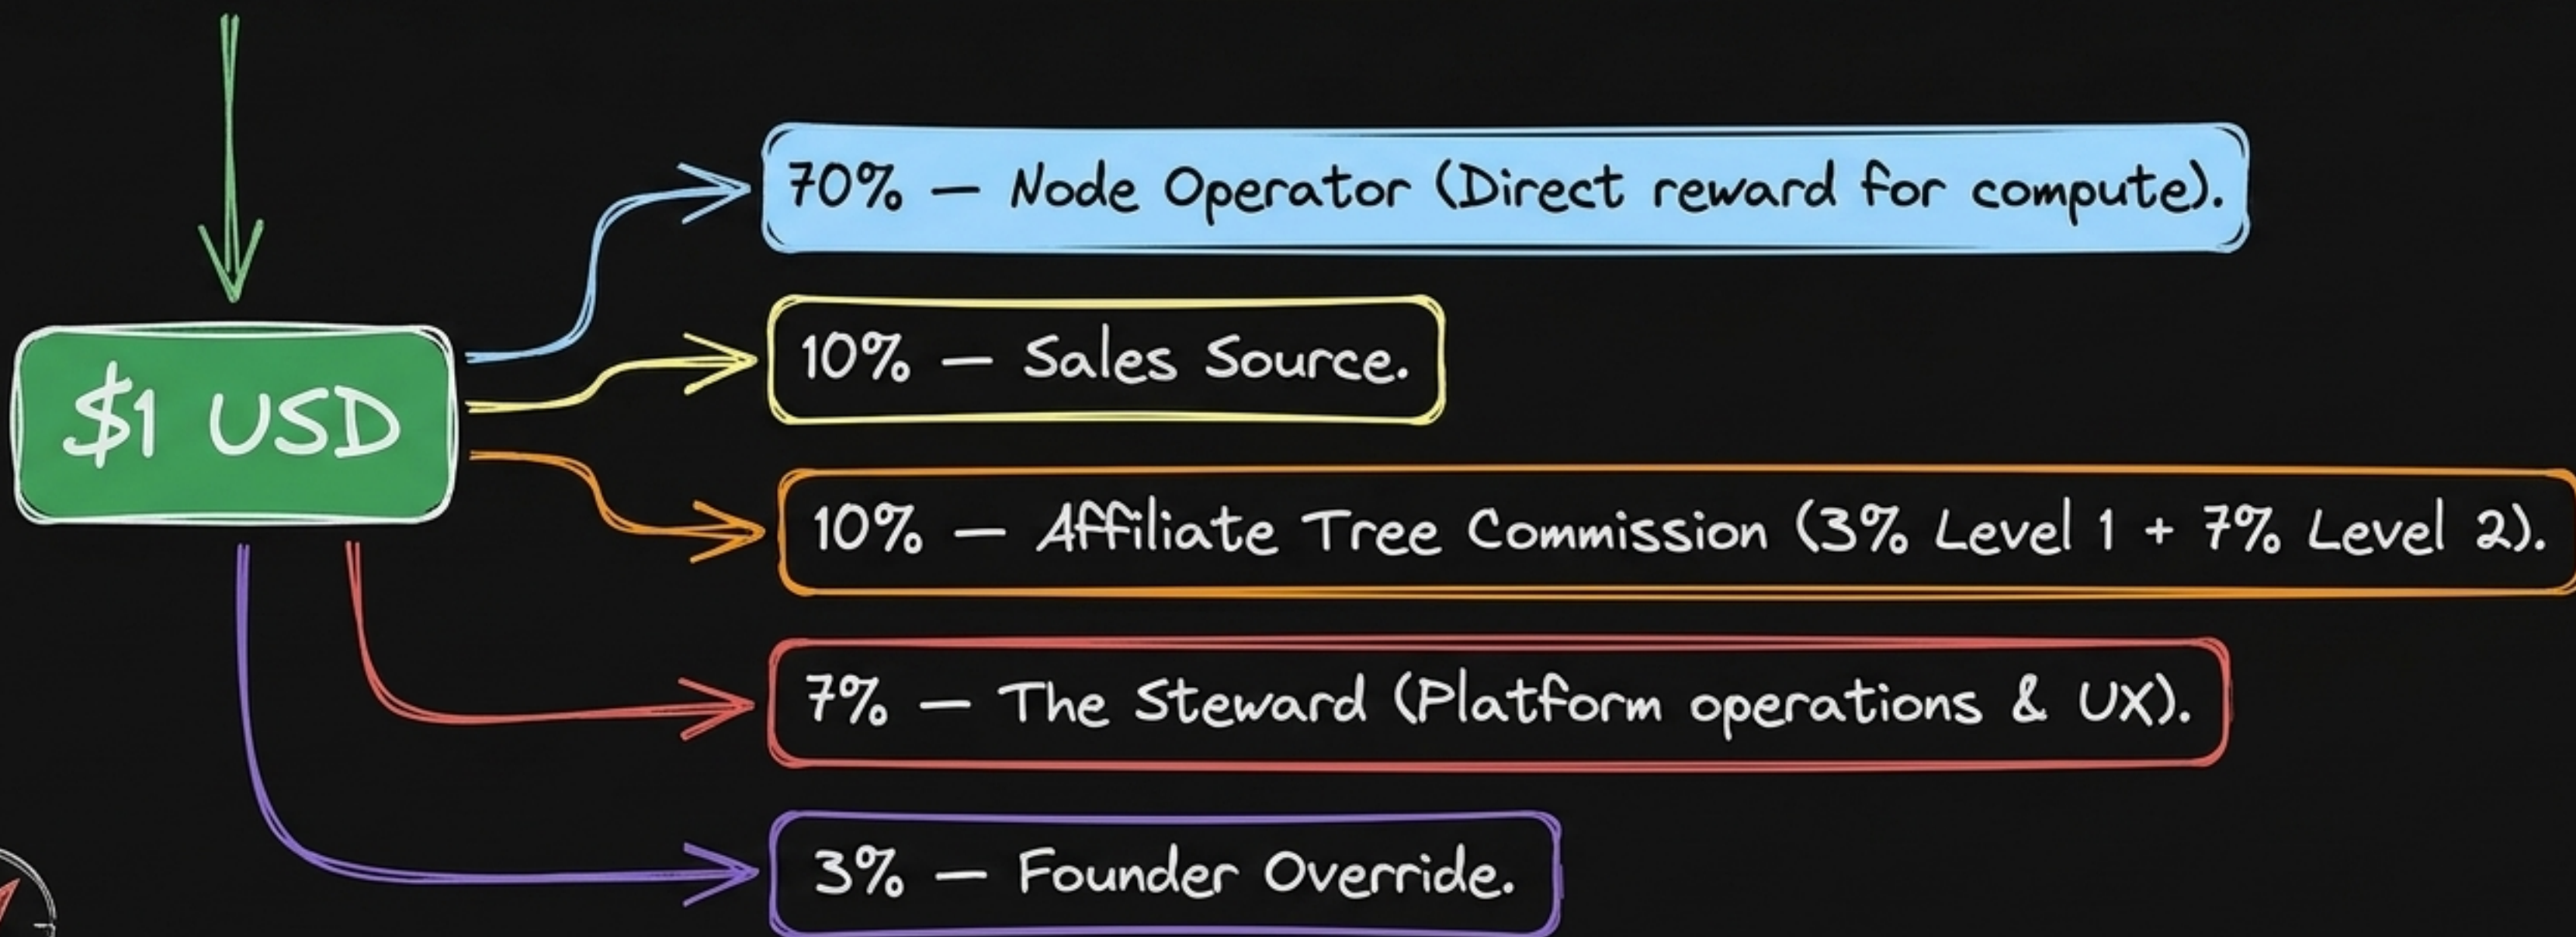

Elimination of third-party cloud reliance to guarantee censorship resistance and absolute resilience.

The Economic Engine: FIAT-First Flow

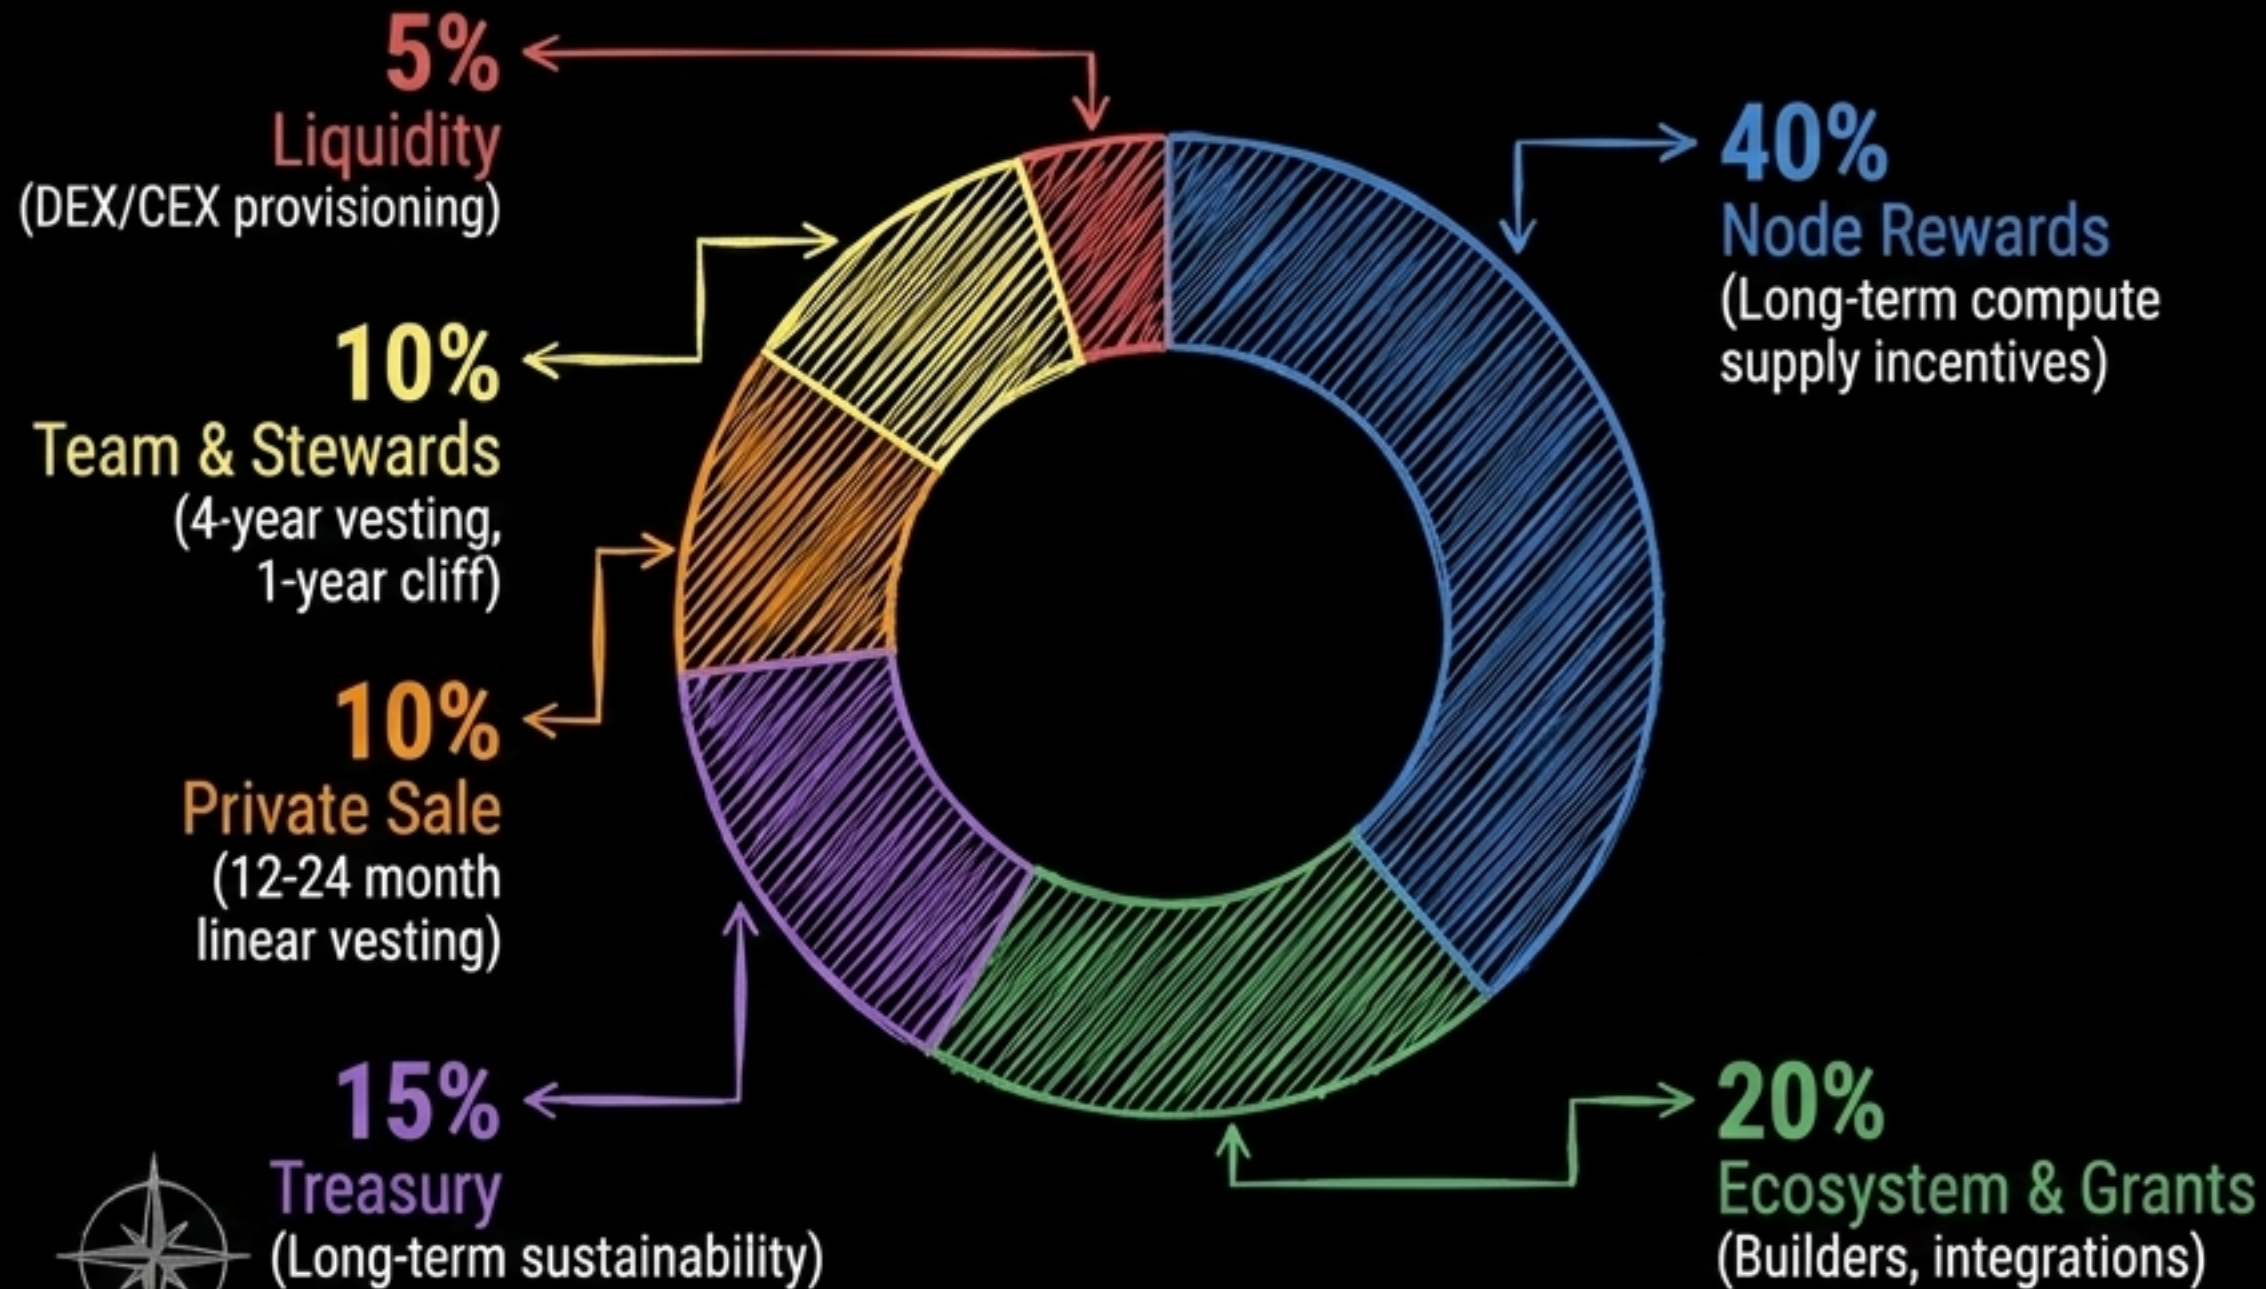

The Core Differentiator: Customers pay in USD. Operators earn in USD. Wnode is regulator-safe, enterprise-ready, and immune to token price volatility breaking the business model.

Tokenomics: The WNODE Utility Token

Fixed Supply: 1,000,000,000 WNODE. Zero inflation. Zero hidden emissions.

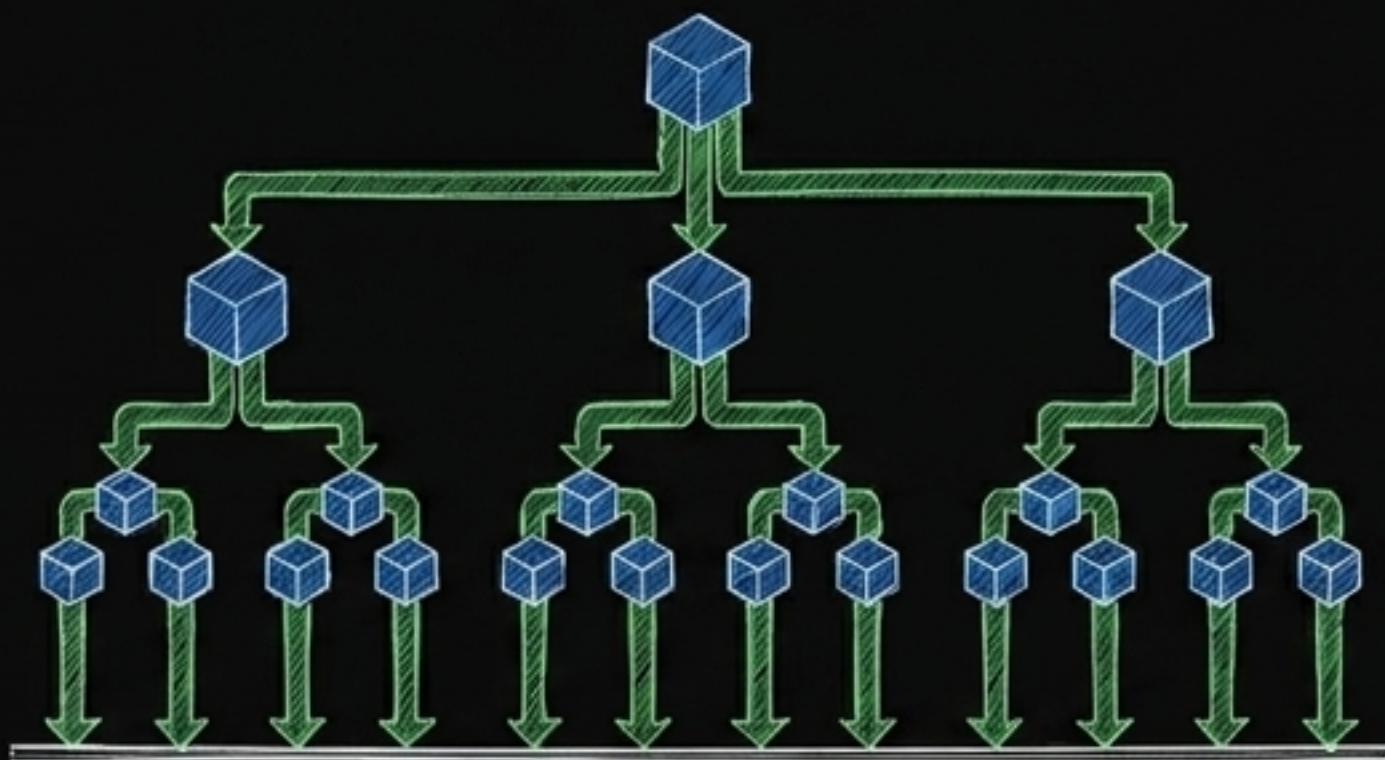

Utility Checklist

- [x] Staking for reliability.
- [x] Performance-based node bonuses (Dual-incentive with FIAT).
- [x] Partner payments.
- [!] ZERO governance rights.

Commercial Assets: Viral Affiliate Trees

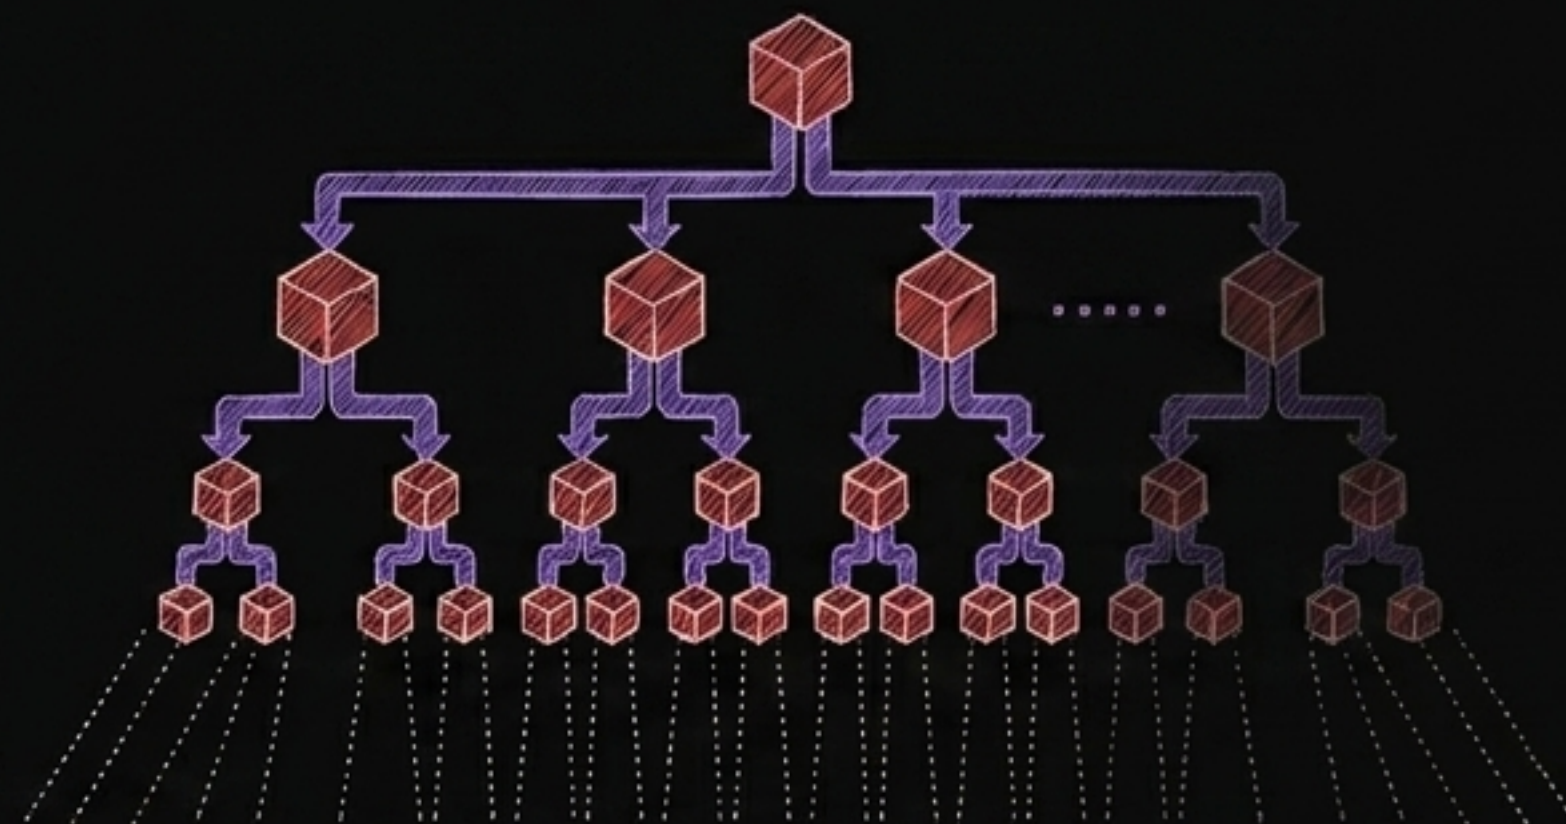

Immutable, permanent, and sellable commercial assets. Strictly separated from governance.

NODLR Affiliate Trees

- Strictly limited to Level 1 (3%) and Level 2 (7%).
- Prevents pyramid-style expansion while driving organic network growth.

Founder & Partner Affiliate Trees

- Infinite depth.
- Entitles the Founder to a permanent 3% of the entire tree to infinity.
- A constitutionally protected, core immutable provision.

The Governance Philosophy: 1 Soul = 1 Vote

Total immunity to whale manipulation, vote-buying, and plutocratic capture.

Tokens (WNODE)

Asset Type: Economic.

Nature: Transferable, sellable.

Accumulation: Infinite.

Voting Power: ZERO.

Souls (Identity / WUID)

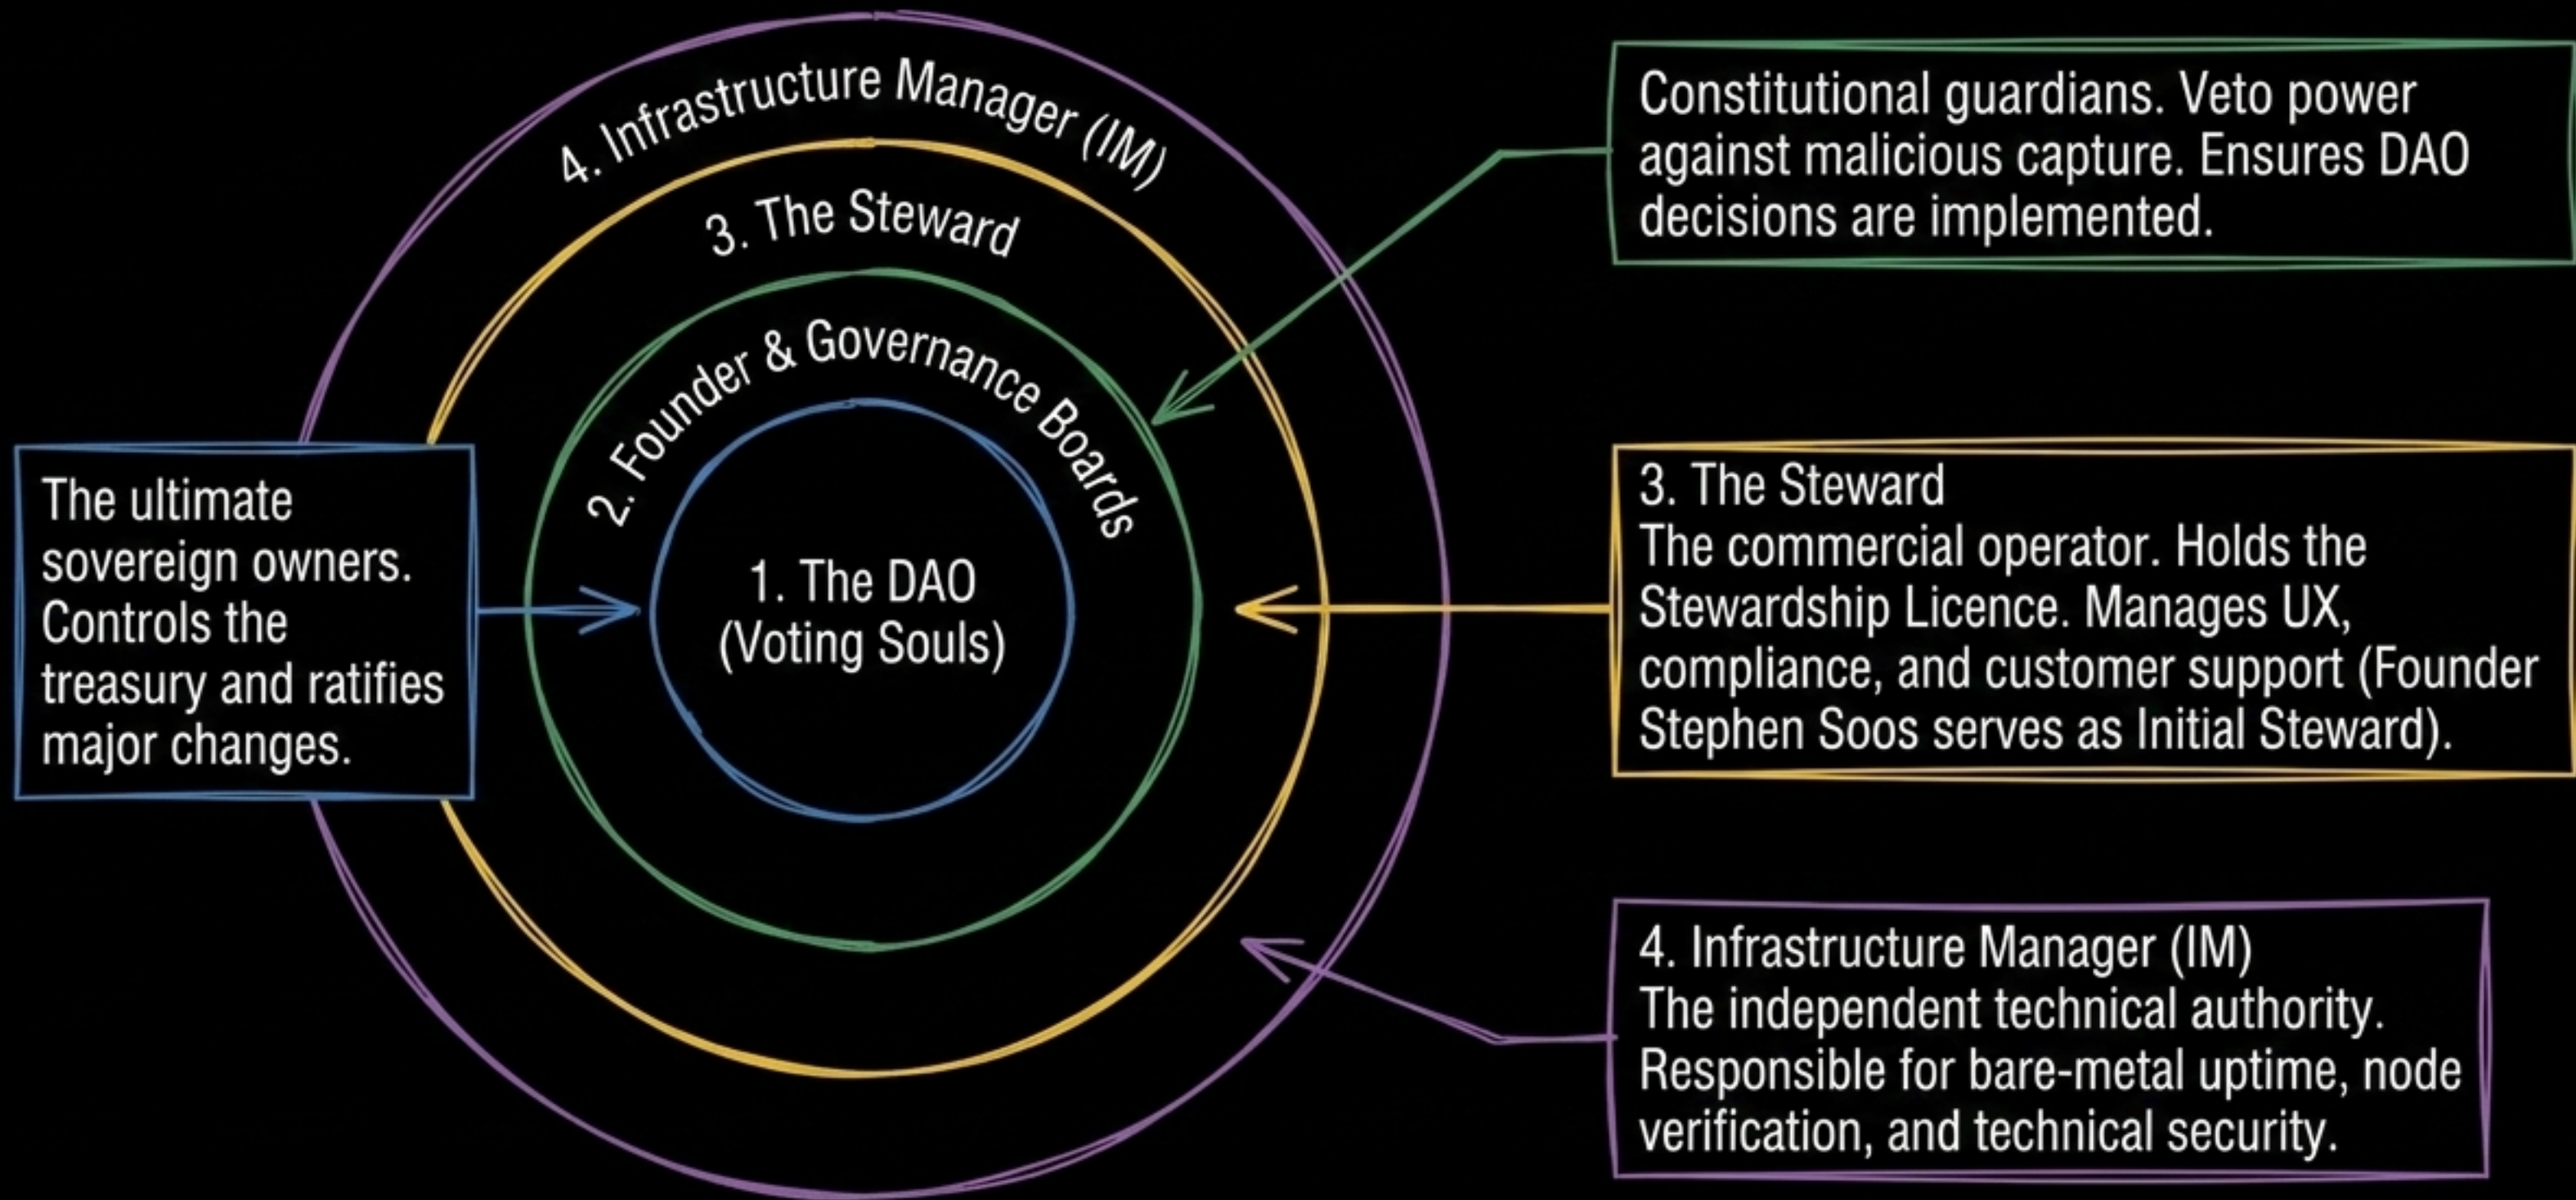

Asset Type: Governance.

Nature: Bound permanently to a single human. Non-transferable.

Accumulation: Strictly 1 per person.

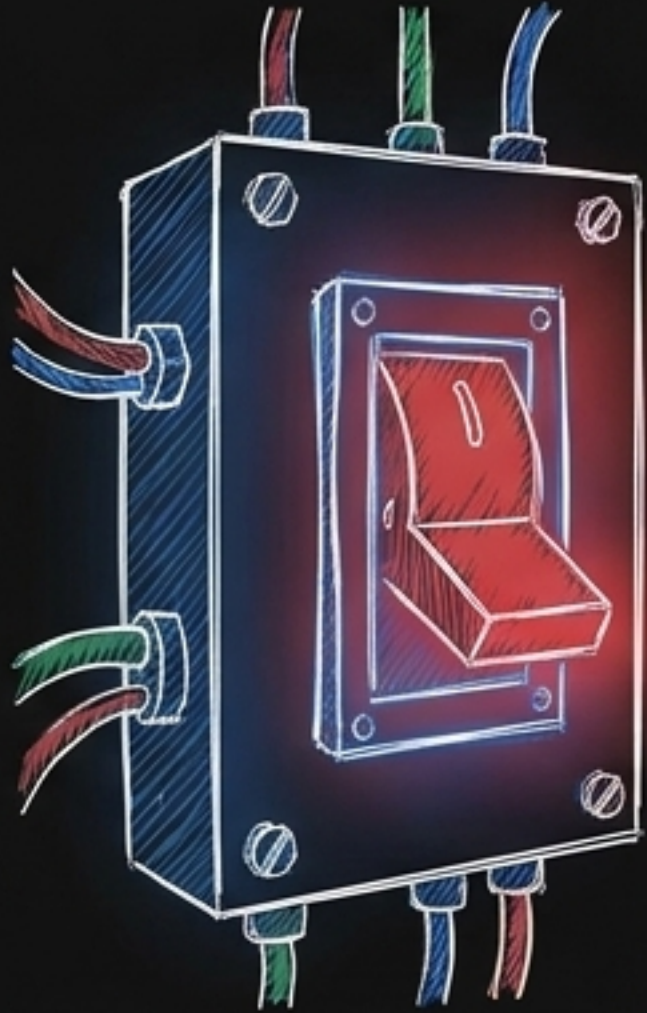

Voting Power: 1 Soul = 1 Vote.

The Separation of Powers

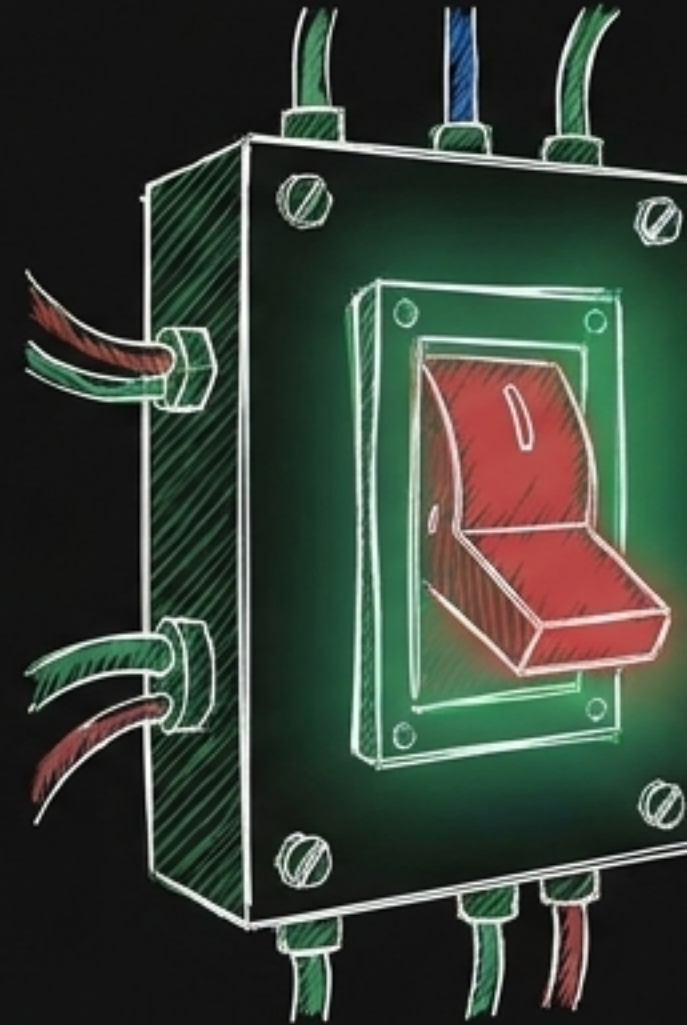

Emergency Powers & Protection Mechanisms

Defensive, time-limited powers to protect the Mesh from catastrophic harm.

Technical Circuit Breaker (The IM)

Can instantly suspend malicious nodes, isolate network segments, and enforce technical lockdowns without prior approval to stop active attacks.

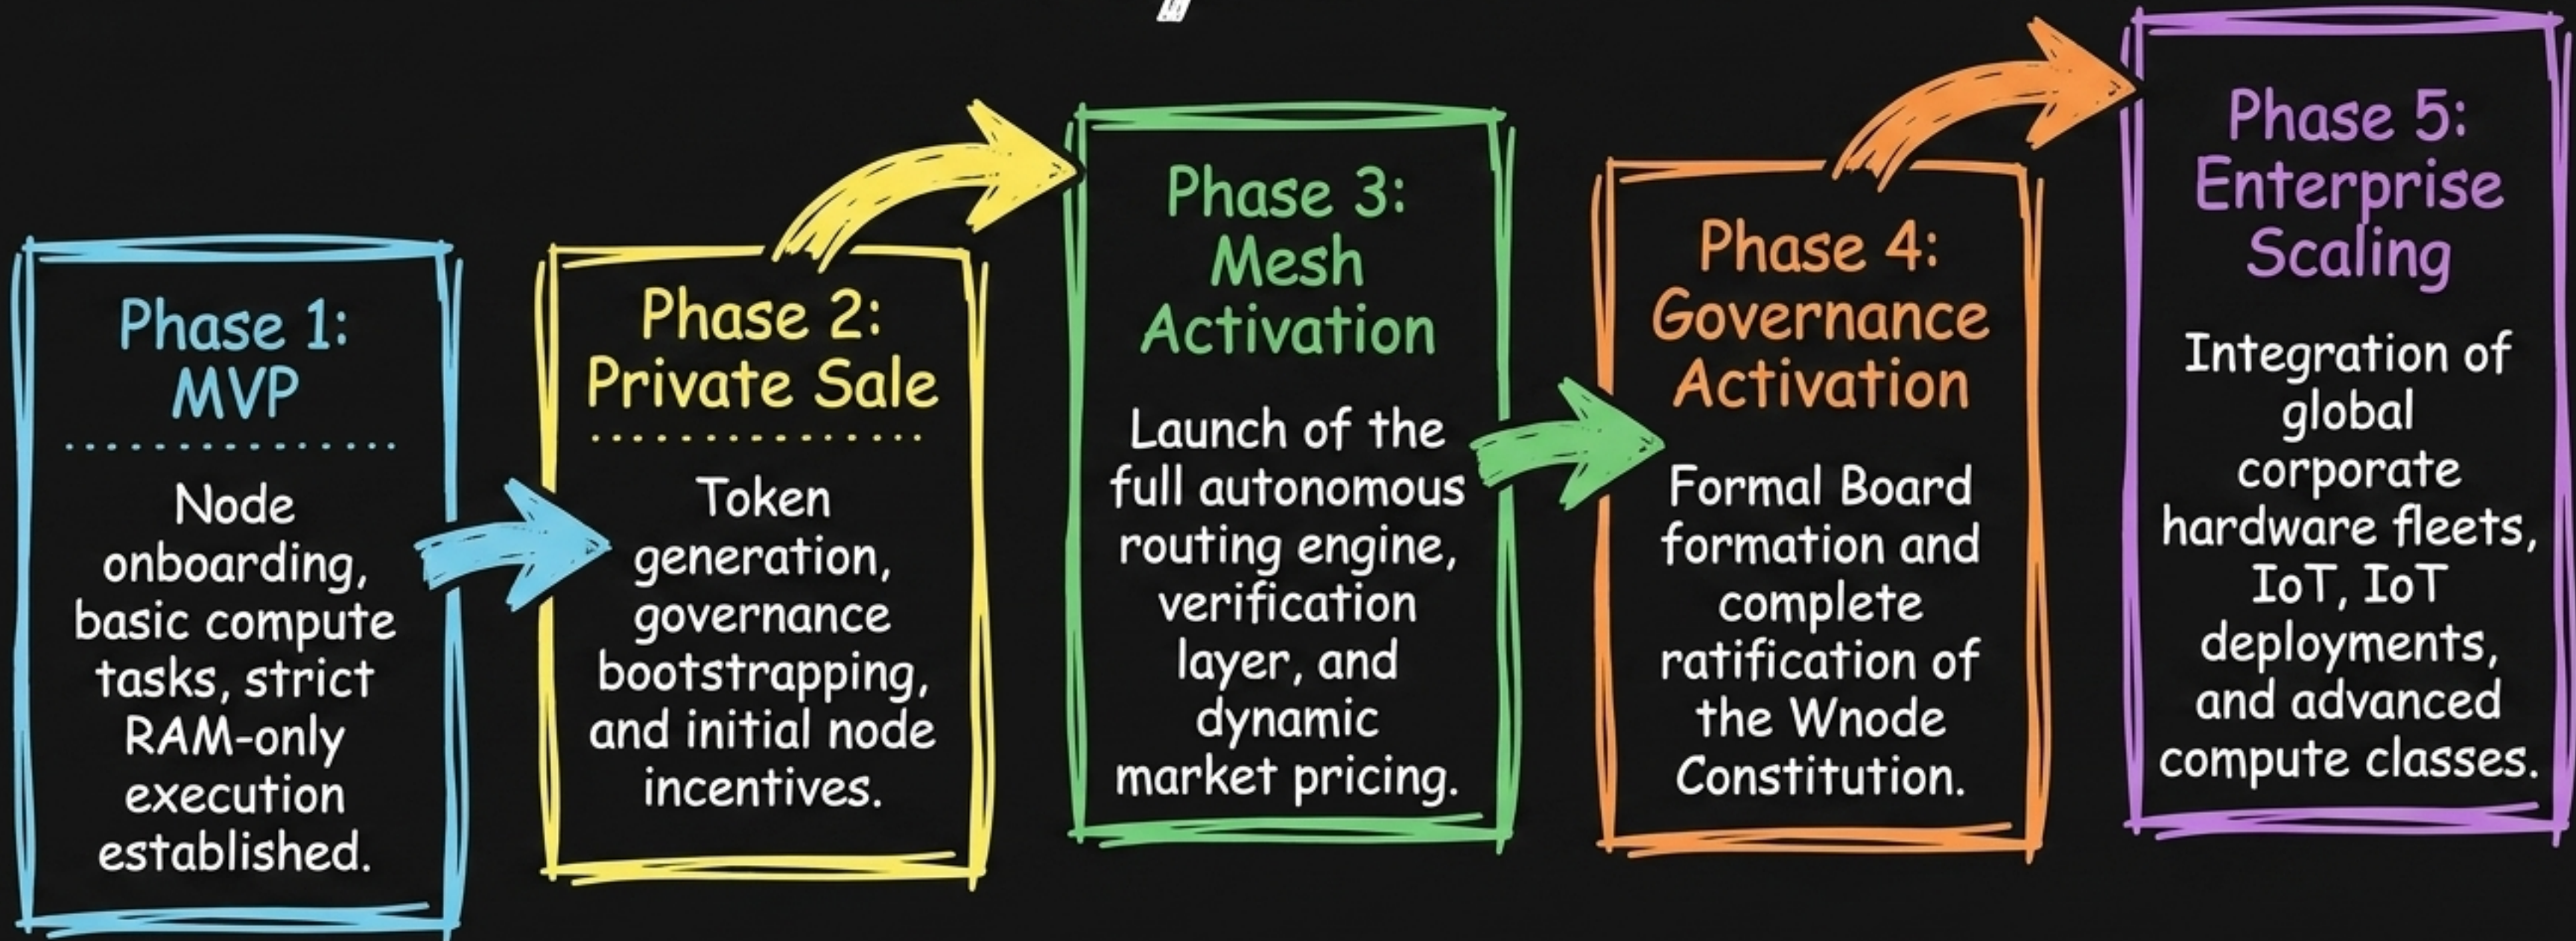

Governance Circuit Breaker (Founder Board)

Can freeze malicious proposals or temporarily freeze Governance processes to prevent hostile takeovers.

The 72-Hour Limit: All emergency powers are strictly limited to 72 hours (with one highly scrutinized 7-day extension possible). Actions are fully auditable and subject to DAO oversight post-crisis.

Roadmap to Planetary Activation

Synthesis: The Ultimate Public Good

Synthesis Statement: Wnode is the convergence of raw, decentralized compute power, sustainable fiat economics, and incorruptible human governance.

The Ask: Private Sale Round.
Funding the transition from MVP to full Planetary Mesh Activation.

Compute for the people, owned by the people.
