

WNODE: The AI-Powered Planetary Compute Mesh

Turning the world's idle hardware into sovereign, hyper-scalable AI compute.

Zero Hardware CAPEX

Scaling without data center overhead

Massively Scalable Supply

Every device is a potential node

Recurring Usage-Based Revenue

Monetizing the \$1T AI compute demand

Unlocking the \$1 Trillion Compute Bottleneck

25%

The Macro Shift

Up to 75% of global hardware sits idle while AI workloads starve.

The Legacy Cloud

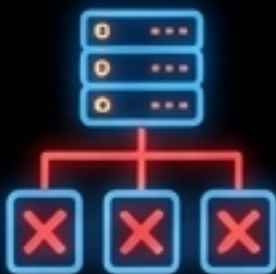

Scarcity

Limited of store hamdecad scarcity for Intenstivity

Monopolies

Montority to be takes at rilks from unlirely monopolies

Fragility

Fragility in lresilience to bil and refrac monopolies.

The Wnode Paradigm

Elasticity

Elasticity inc expands iability of global network players

Economics

Growth rites lows in market and enchains of economics

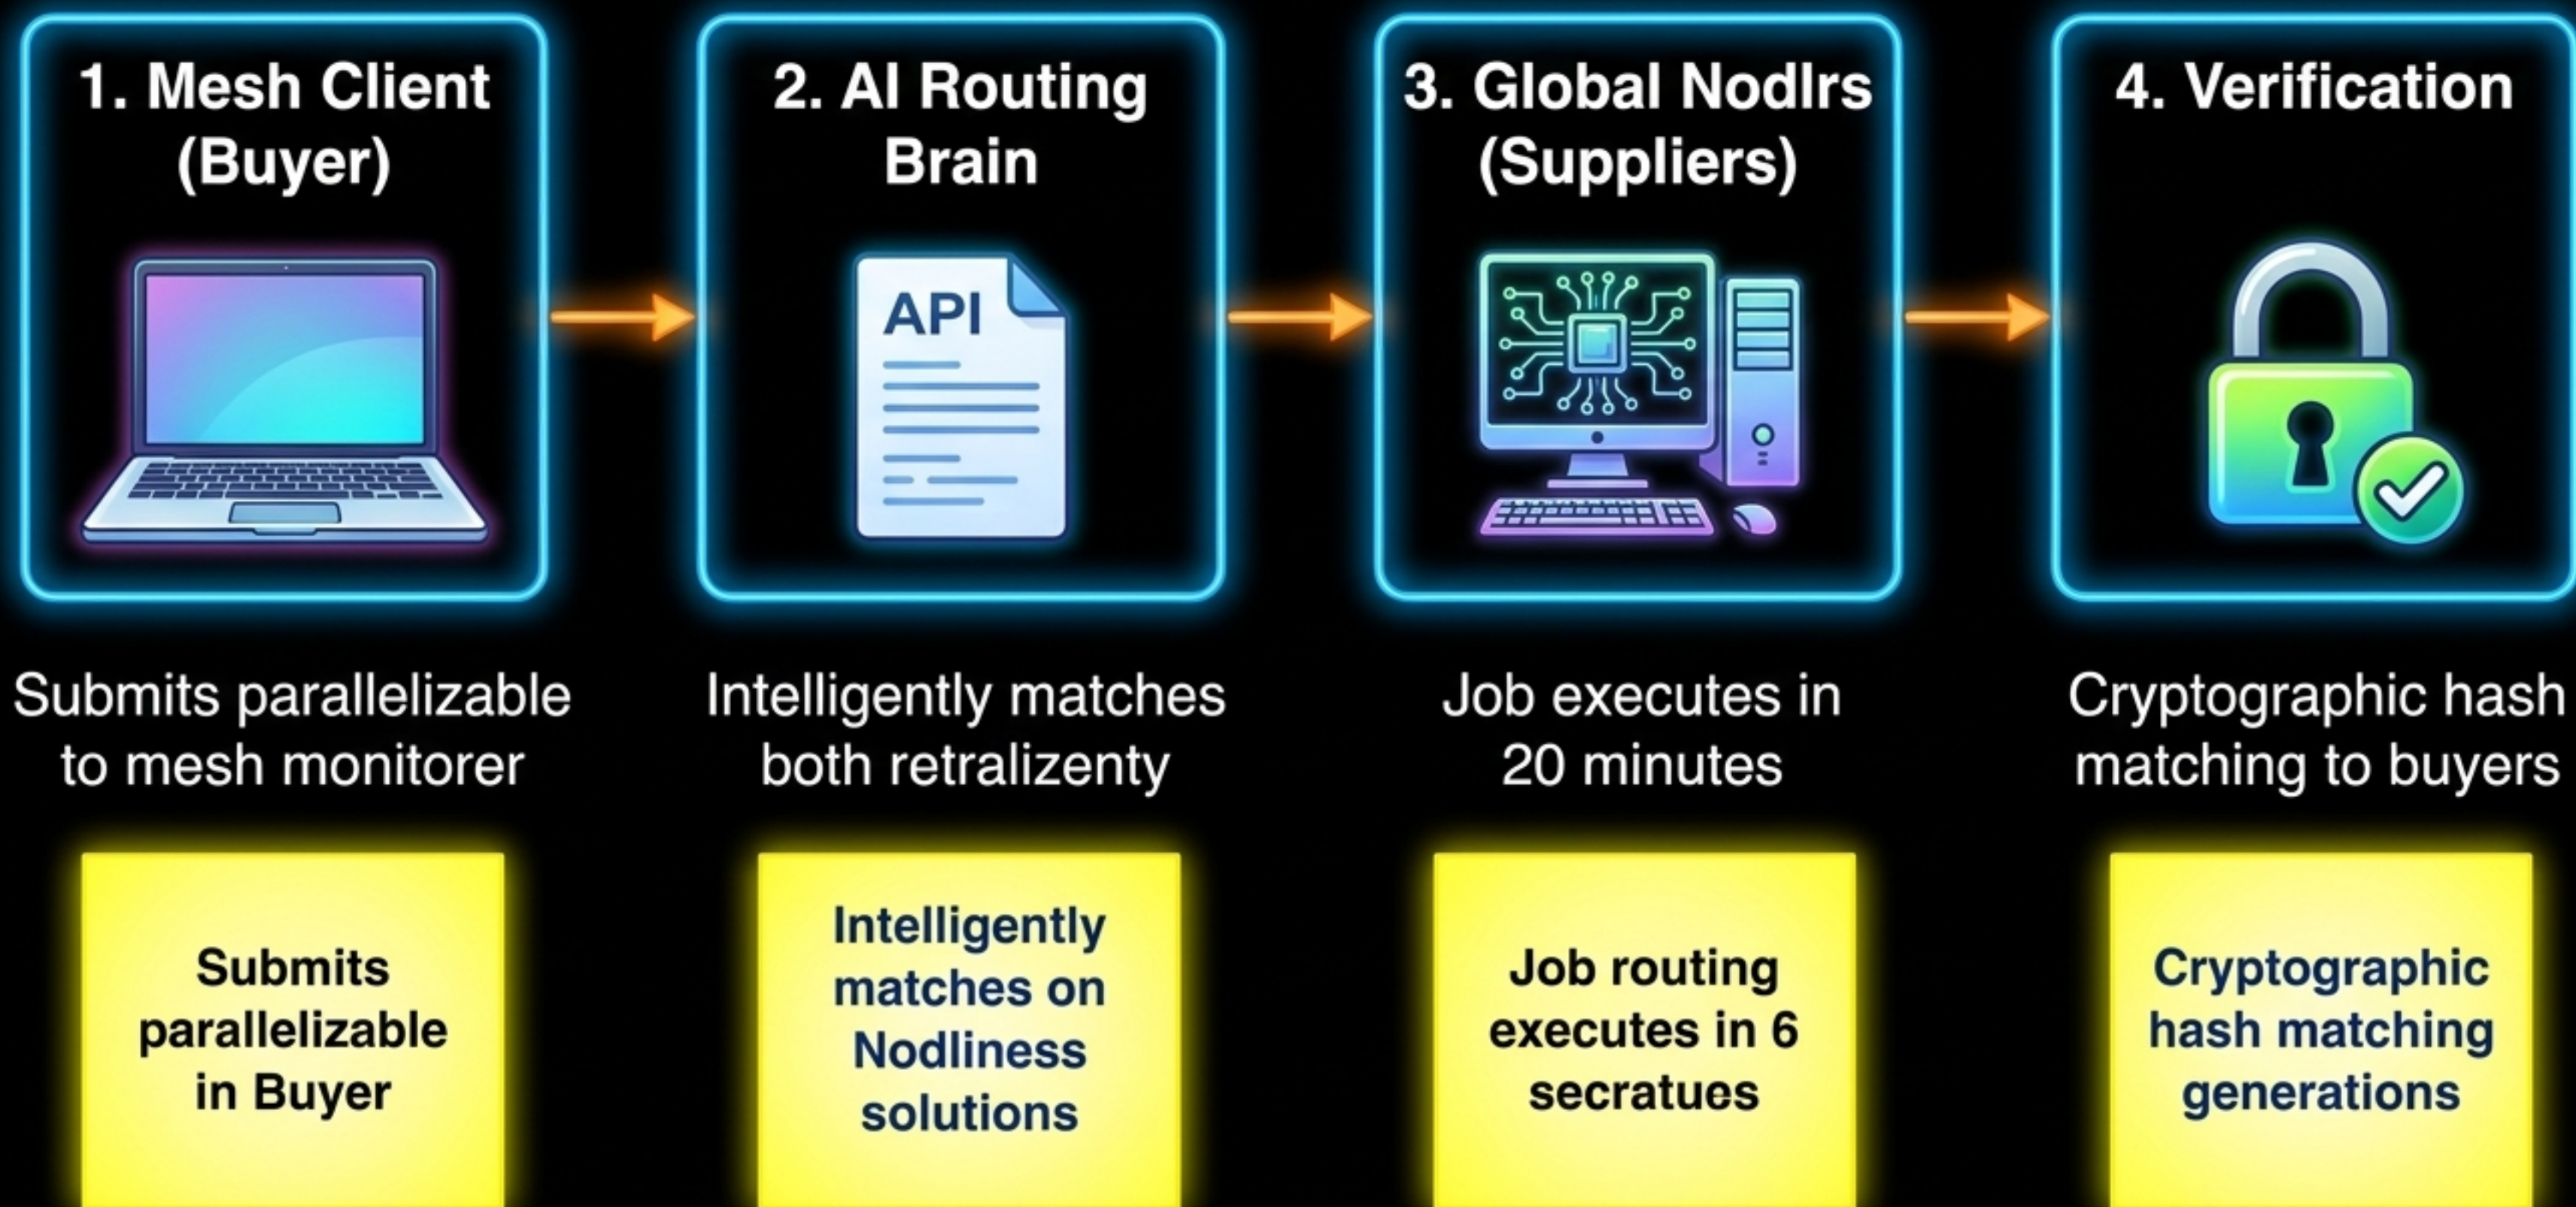

Resilience

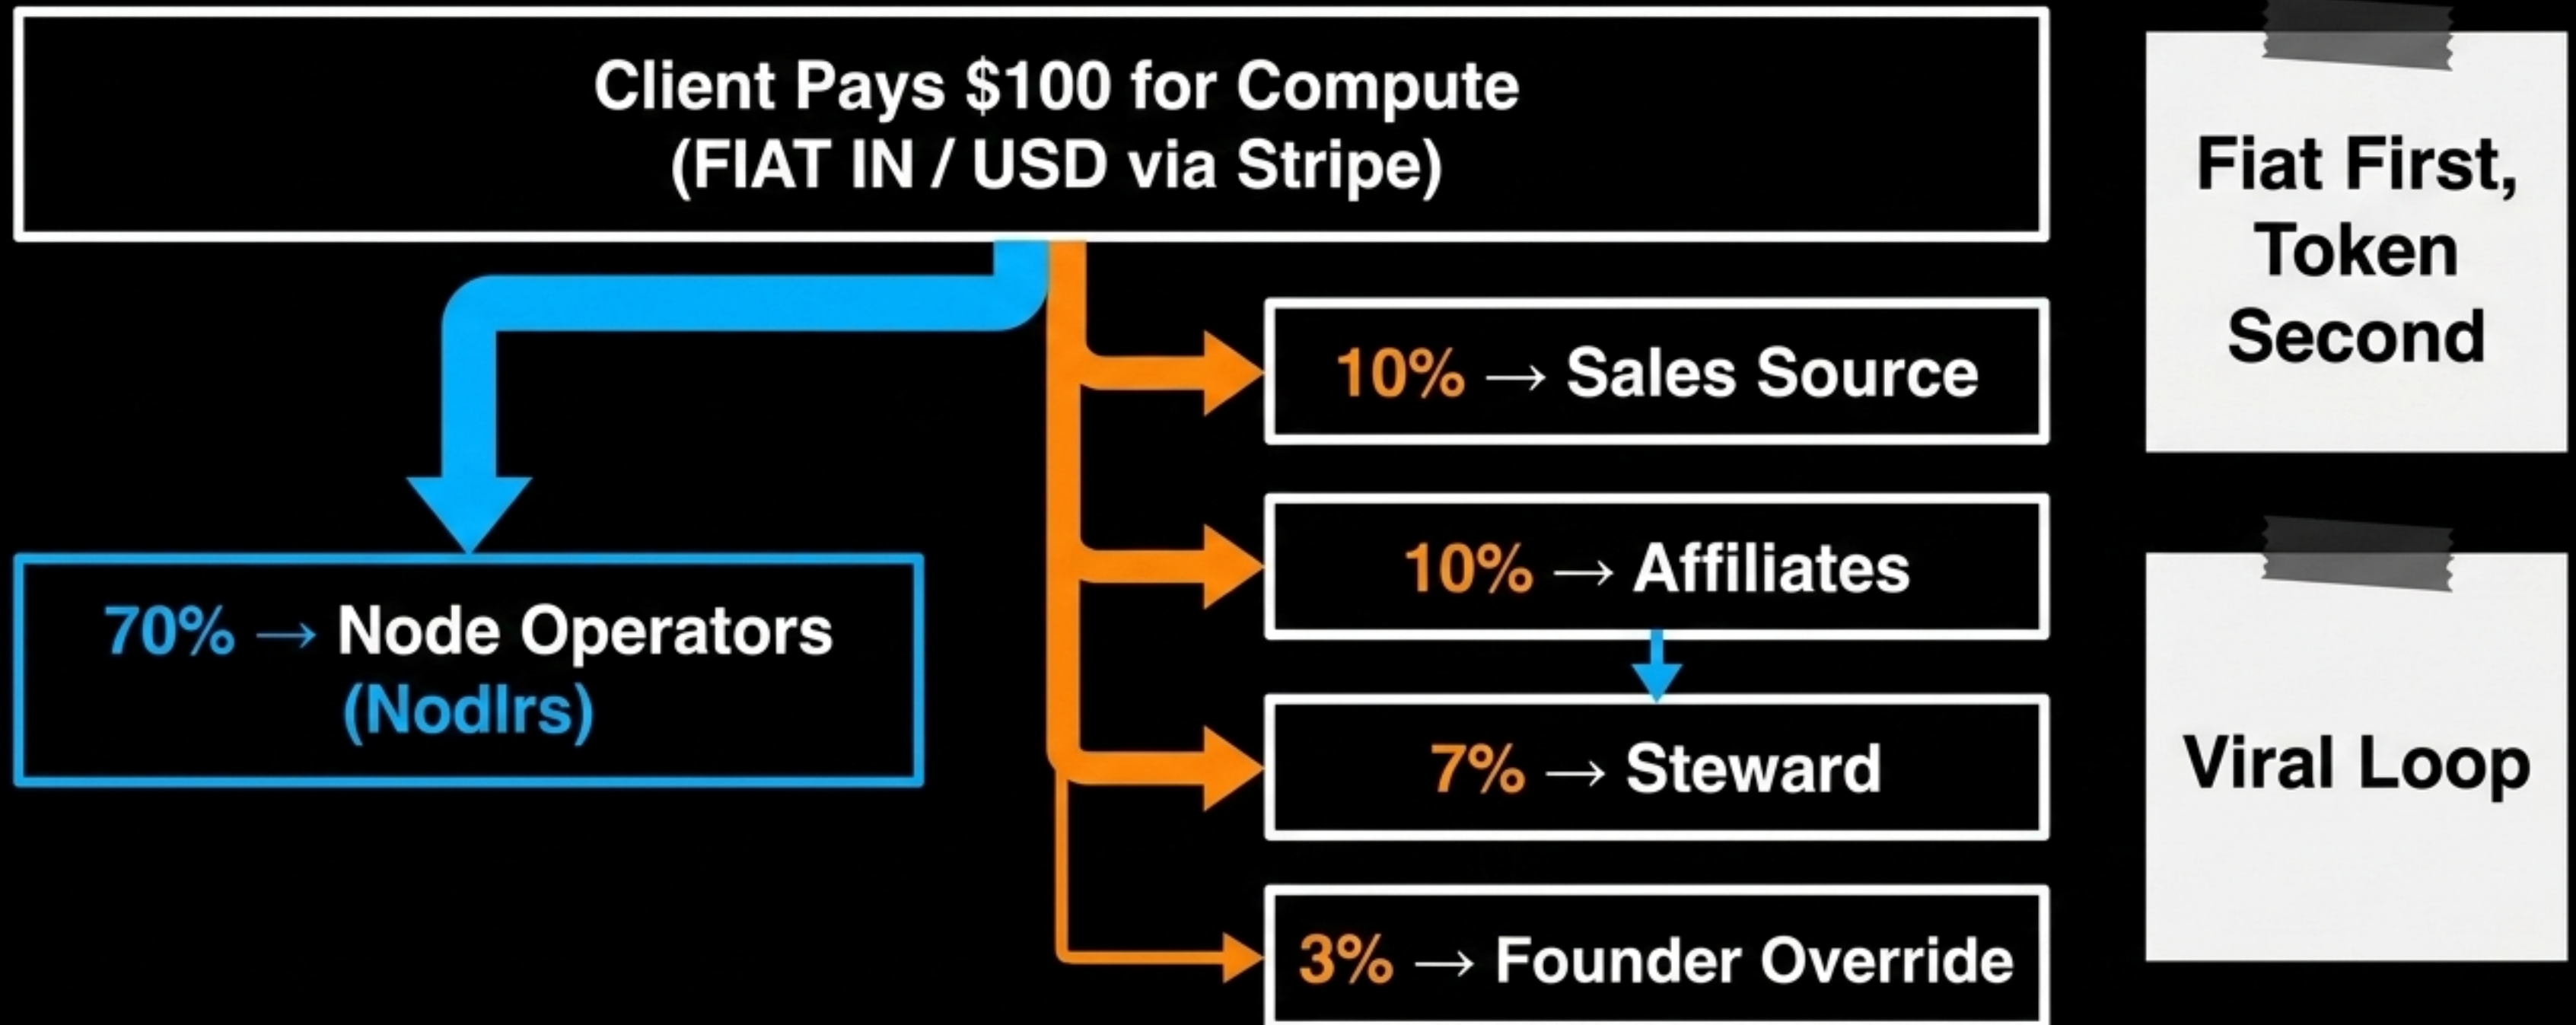

Resiliences preasures with decentralized network

The Zero-Trust Routing Engine: Fully Automated Execution

The Economic Engine: Fiat-First Revenue Flow

The Moat: Capture-Resistant Sovereignty

Top Layer: Infrastructure Independence

Wnode owns its core physical servers, solar arrays, and a proprietary Recursive Sovereign AI LLM. Zero reliance on third-party cloud.

Operational oversight, proposal or validation, and Ensures seamless execution of DAO intent.

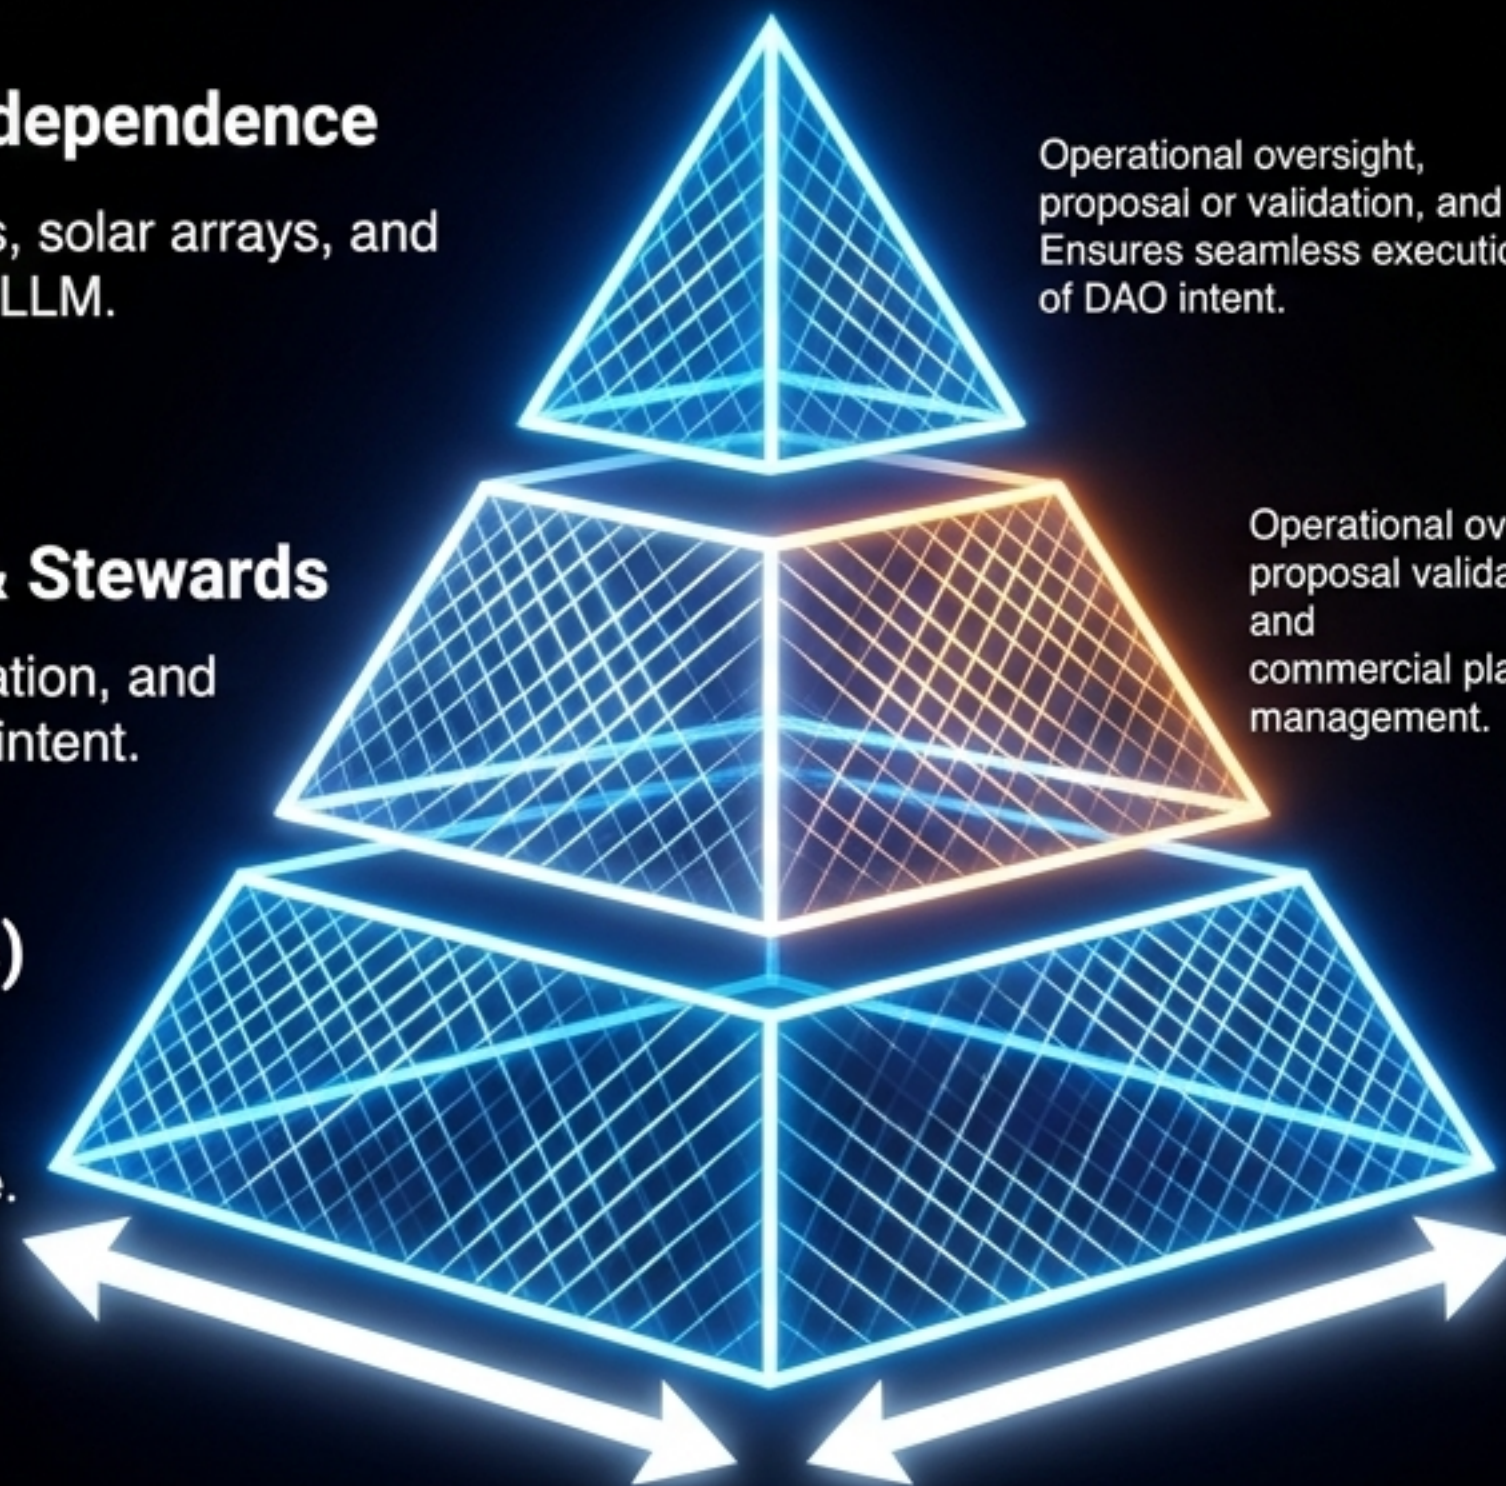

Middle Layer: Governance & Stewards

Operational oversight, proposal validation, and Ensures seamless execution of DAO intent.

Operational oversight, proposal validation, and commercial platform management.

Base Layer: The DAO (Souls)

1 Soul = 1 Vote.
Strict human verification (Stripe KYC).
Tokens are economic, not governance.
Whales cannot buy political power.
Un-capturable.

Total Separation:
Commercial assets (Affiliate Trees) and Economic assets (Tokens) are strictly firewalled from Governance assets (Souls).

The Roadmap to a Planetary Compute Mesh
