

Term Sheet: WEX Private Seed Round

Project Name: Wnode (Wenode) Founder: Stephen Soos

Investment Instrument: SAFT (Simple Agreement for Future Tokens)

Total Token Supply: 10,000,000 WEX (Fixed-supply; no further minting)

1. Investment Summary

Raise Target: \$80,000 USD

Asset Type: WEX Utility Token

Private Seed Price: \$0.116 per WEX

Public Launch Price: \$0.166 per WEX

Strategic Discount: 30%

Investor Token Allotment: ~689,655 WEX (approximately 6.9% of total supply)

2. Lockup & Vesting Schedule

To ensure long-term stability and project alignment, the following vesting rules apply:

Founder & Council Allocation: 6-month cliff followed by 18-month linear vesting.

Private Seed (Investor): Subject to a 12-month linear vesting schedule

Liquidity Pool: Minimum 12-month lock on DEX liquidity.

3. Final Allocation Table

Total Supply: 10,000,000 WEX

Allocation	%	Amount	Purpose & Strategy
Node Rewards	20%	2,500,000	Long-term incentives for verified compute providers.
Investment Rounds	20%	1,500,000	Combined Private Seed and Public Presale capital.
Liquidity Pool	15%	1,500,000	Locked DEX liquidity to ensure market stability and depth.
Founder Council	10%	1,000,000	10 Prestige advisory slots for OEMs and industry visionaries.
Operations	10%	1,000,000	Core dev, security audits, and daily network management.
DAO Treasury	10%	1,000,000	Ecosystem sustainability, R&D, and future-proofing.
Founder (Stephen Soos)	5%	500,000	Dedicated lead founder allocation to ensure long-term alignment.
Growth & Infra	5%	500,000	Marketing, user acquisition, and direct mesh scaling.
Partner Allocations	5%	500,000	Strategic hardware and OEM integration incentives.
Total	100%	10,000,000	Fixed Total Supply

4. Governance & Network Architecture

- Hybrid Architecture: **Wenode** utilizes a "Fiat-First" model with Stripe integration for seamless non-crypto enterprise onboarding.

- Radical Governance: WEX implements a "One Soul, One Vote" model. Sovereignty: Voting power is restricted to verified human node operators (NODLRs).
- Anti-Plutocracy: Governance is not token-weighted; holding more tokens does not grant additional influence.
- Advisory Board: The Founder Council serves in an advisory capacity only and cannot override the community.

5. Use of Funds

The \$80,000 raised in this round is strictly allocated for:

- Direct procurement of mesh-scaling hardware.
- Technical acceleration of the AI-powered planetary compute mesh.

Footnote: Token Naming Clarification & Deprecated Test Deployments

During early technical preparation for the Wnode private sale, two preliminary WNODE test tokens were minted to validate deployment parameters. These were internal test deployments created before the final WEX tokenomics were completed. They were never used, never distributed, and contain no supply or functionality.

The **only official token** recognized by the Wnode ecosystem is:

WEX — 0xa382506695f825fe807C3f4D47aEB986046bdc57

The following two early WNODE deployments are formally **deprecated** and not part of the Wnode economic model:

- 0xF7bB2ea845b9e56aEf9E364d6Ae05Ea88236ca40
- 0x62eFDE5D3C2318E01237eFBb7Eac35BdC7a14D53

Wnode maintains a **single canonical token** with a fixed supply of 10,000,000 WEX. No additional tokens will be created.
